SYWORKS Vision & Mission

Your Success, Our Code

**'Your Success, Our Code' signifies that our customers' success begins with SYWORKS' technology and software.
We prioritize achieving our customers' goals and constantly strive to provide the finest code to make them a reality.**

Mission

Transforming the world through innovative software solutions and creating a future where technology enables a better life for everyone.

Vision

Aiming to create a positive impact on customers and society by developing software products that deliver the best user experience and sustainable value.

Providing innovative and stable software solutions that lead the industry by utilizing the latest technologies to meet customer needs.

Core Value

1. Customer First
2. Pursuit of Innovation
3. Quality Centric
4. Valuing Teamwork
5. Growth & Learning
6. Sustainability

COMPANY OVERVIEW

A Business Partner Realizing Customer Needs through Innovative Solutions

SYWORKS delivers differentiated satisfaction through customized solutions based on a precise analysis of customer requirements. Grounded in extensive expertise and innovative technology, we support our customers' successful future. We promise to be your premier partner, growing together with trust as our top priority.

Company Overview

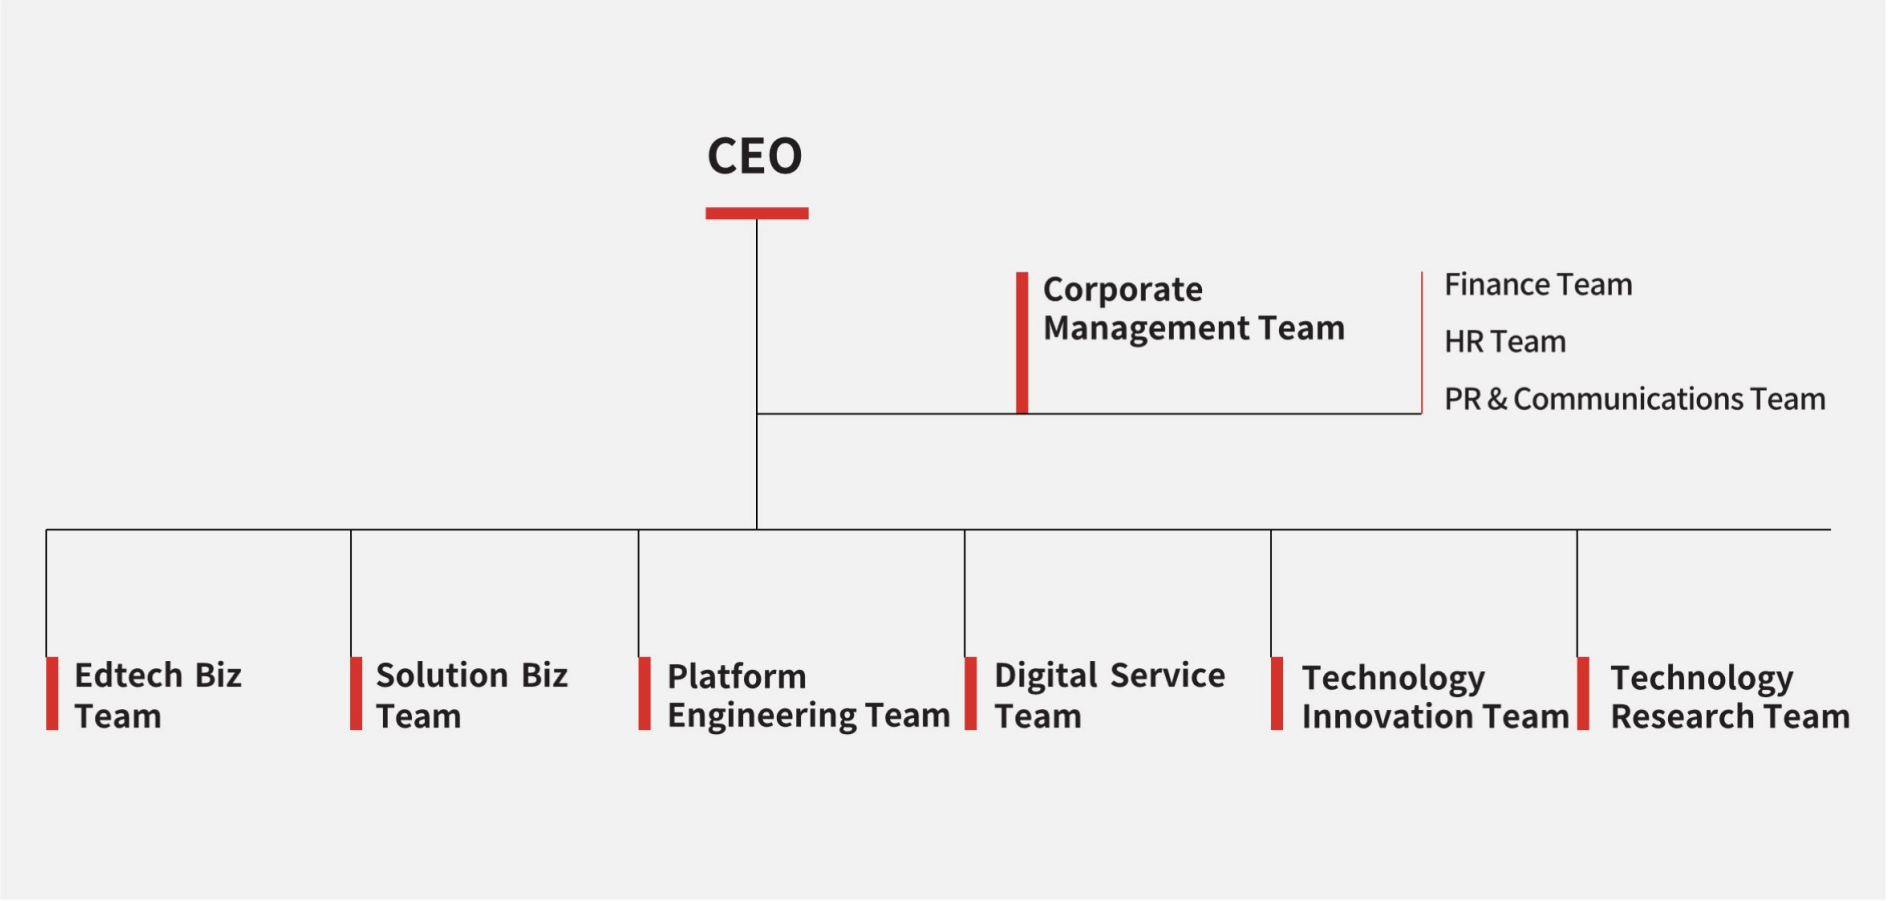
(As of late December 2025)

Company Name	SYWORKS Corp.
CEO	Tae-Hoon Kim
Date of Establishment	May 15, 1998
Business Areas	Business system development, UI/UX consulting and production, web/mobile services, network security solutions
Address	SYWORKS Tower, 11, Baumoe-ro 37-gil, Seocho-gu, Seoul, Korea
Capital	450,000,000 KRW
Number of Employees	60
Website	www.syworks.com

Organizational Structure

An Organization Creating Customer Value through Systematic Collaboration and Expert Talent

Professionals with extensive practical experience in each field communicate organically to maximize business synergy. Through an efficient management system and a flexible organizational culture, we rapidly address complex customer requirements and concentrate our capabilities on ensuring sustainable service quality.



History

Leading the Software Industry Through Relentless Challenges and Innovation

Since its founding in 1998, SYWORKS has grown steadily by delivering innovative solutions that keep pace with changing markets and customer needs.

1998 Founded SYWORKS (May 15)

2000 Renamed to SYWORKS Corp. & Acquired 'Good Software (GS)' Quality Certification from the Ministry of Information and Communication
Launched CyberWALL2000, the first PC security solution in Korea

2001 Developed and selected as Administrative Software for the Ministry of Government Administration and Home Affairs (CyberWALL)
Acquired TTA Good Software (GS) Certification
Received Ministerial Commendation from the Ministry of Information and Communication
Selected as a Technology Development Partner for the Information and Communication Industry (Ministry of Information and Communication)

SOLUTION BIZ

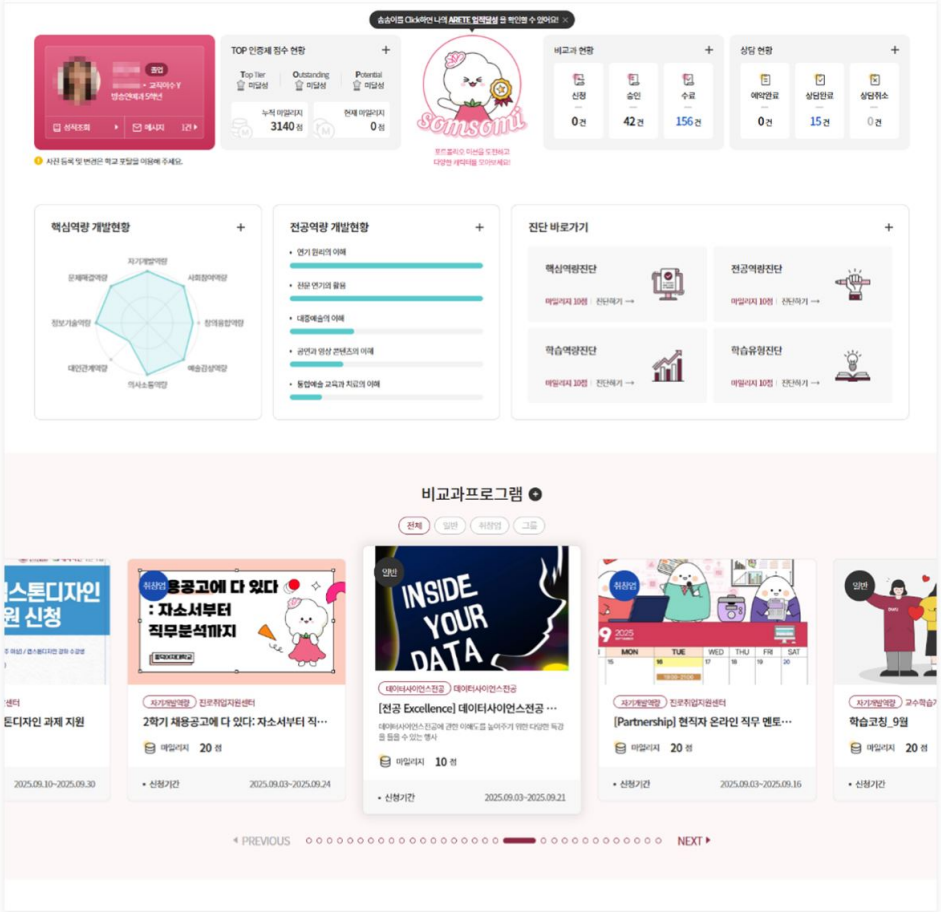
Honeycomb AI-based Integrated Student Competency Management Solution

Honeycomb brings together coursework, extracurricular activities, counseling, competency data, career planning, employment support, portfolios, and AI-powered recommendations to help universities manage student competencies.

Honeycomb provides an environment where students can design their optimal career paths and learning goals based on integrated data covering both curricular and extracurricular activities. Through systematic indicators, effective employment guidance is made possible, allowing universities to enhance educational quality and maximize administrative efficiency simultaneously.



Curriculum / Extracurricular Management

- Management of curriculum completion records, semester grades, and academic performance trends
- Graduation simulation and micro-degree program management (degree application and completion status tracking)
- Personal extracurricular activity management
- Group-based extracurricular management (clubs, mentoring programs, learning communities, study groups)
- External extracurricular activity management (certifications, language tests, competitions, volunteer activities)
- Extracurricular program setup, applicant selection, completion certificate management, and blacklist management

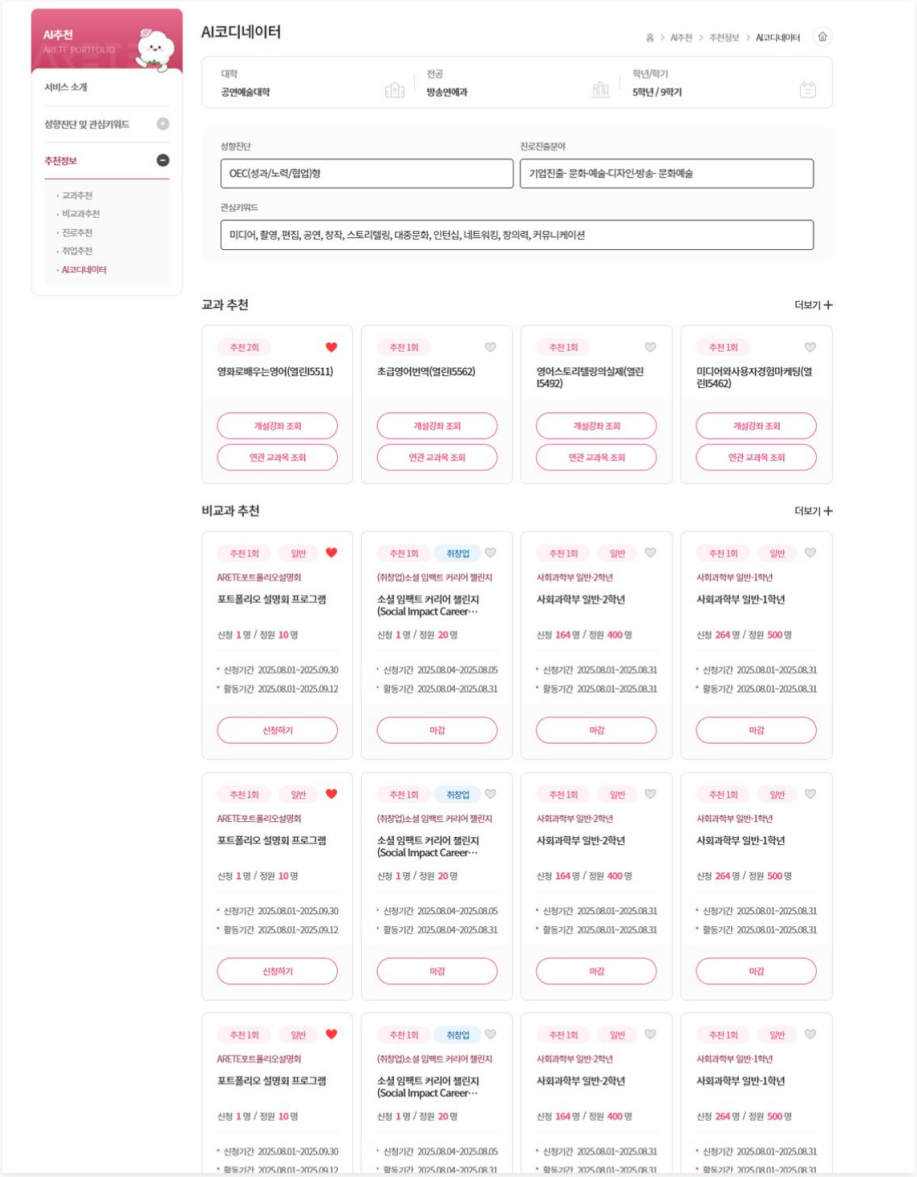
Competency Management

- Core and major competency assessment
- Competency assessment result profiling
- Competency-based curriculum inquiry
- Personalized curriculum recommendations based on assessment results

Mileage / Certification Management

- Mileage policy management, mileage allocation and deduction, and mileage history tracking
- Support for various on-campus certification programs and certification achievement status monitoring

Honeycomb AI-based Integrated Student Competency Management Solution



Counseling Management

- Support for on-campus professional counseling services, including psychological counseling, academic counseling, faculty advising, career and employment counseling, and writing clinics
- Counseling application, reservation, scheduling, and counseling result management
- Integrated and cross-counseling support between different counseling services
- Provision of various counseling statistics and analytical reports

Career / Employment Management

- Career planning and roadmap management
- Integration with WorkNet and external APIs
- Job postings, recommended recruitment, and external recruitment information
- Online feedback services, alumni mentoring, alumni competency profiles, company search, and talent search
- Employment outcome surveys
- Resume and personal statement management
- Portfolio management for print and web use

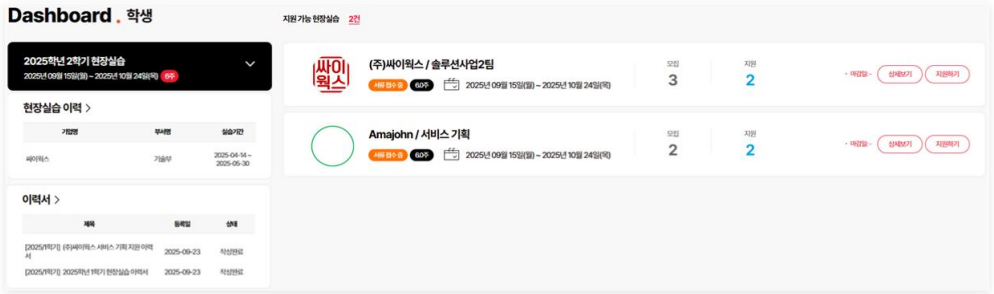
Data Analysis / Personalized Recommendation

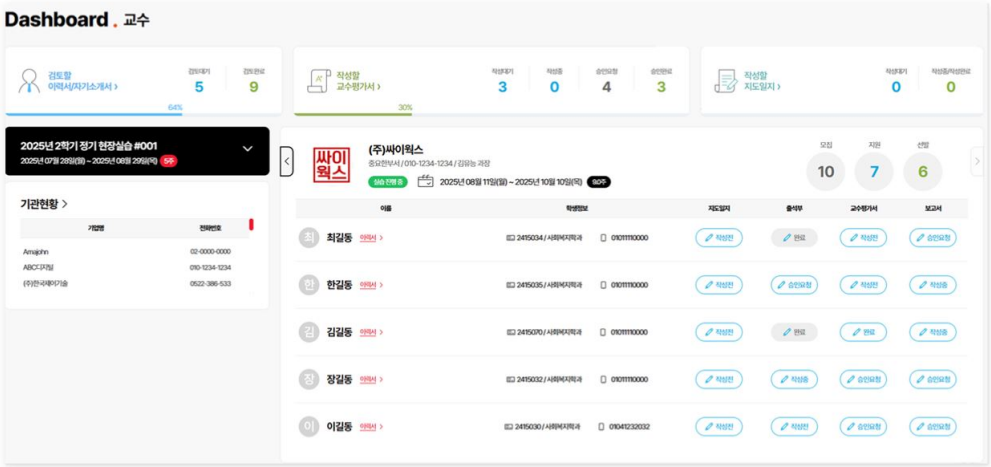
- Student dropout prevention
- CQI (Continuous Quality Improvement) management for curriculum and extracurricular programs
- Recommendation services based on student propensity analysis
- Keyword-based recommendation services
- Personalized recommendations across curriculum, extracurricular activities, career, and employment
- Personalized My Page services (calendar, extracurricular history tracking, interest-based bookmarking, and message management)

WESS University Field Training Support Solution

WESS helps universities manage the entire field training process in one system.

WESS is an integrated online system that follows the Ministry of Education's standard framework for university field training. It supports every stage, from recruiting and registering training institutions to preparing, running, and evaluating field training.





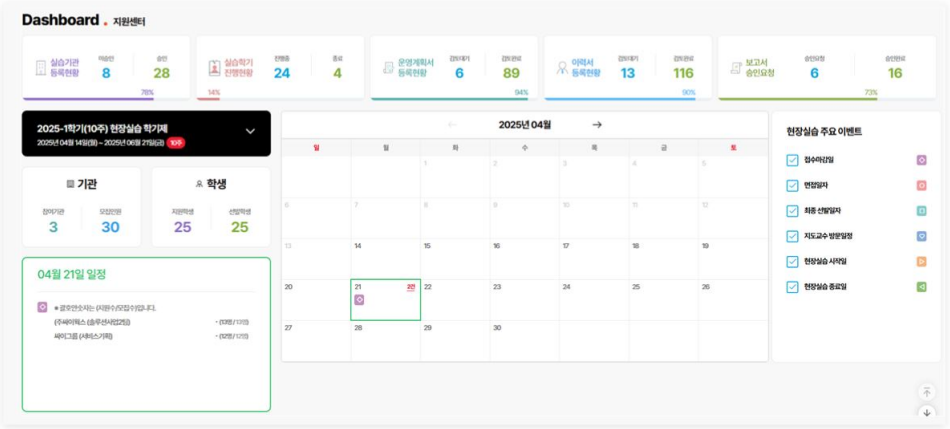
One-Stop Service for Students

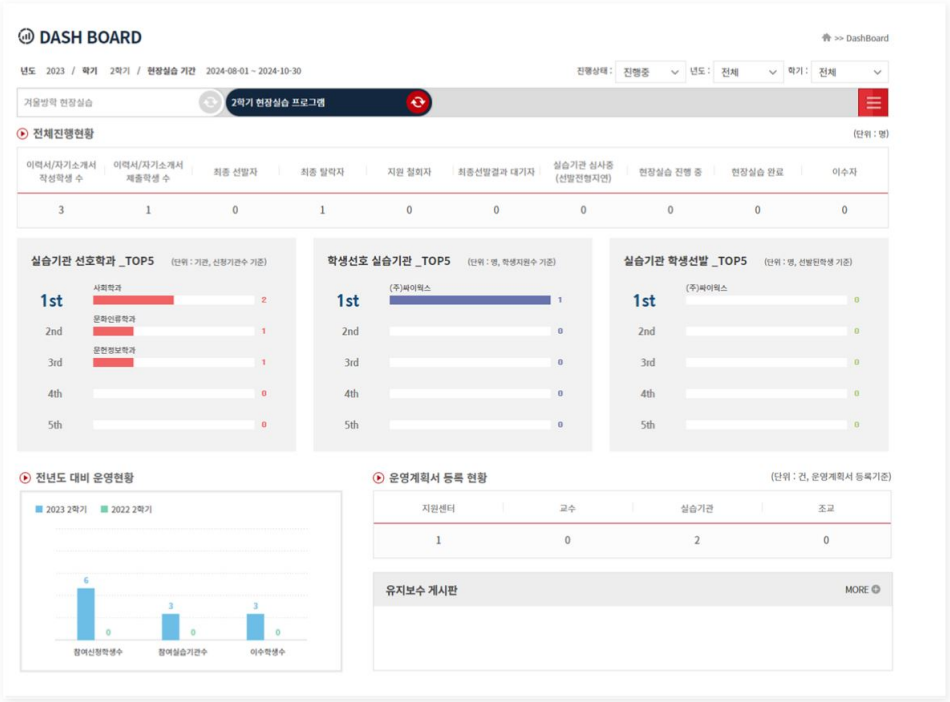
- Guidance on field training programs (participation procedures, credit recognition criteria, precautions, etc.)
- Resume and personal statement creation & management for field training participation, and application result tracking
- Support for On/Off-line tripartite agreements among universities, training institutions, and students
- Preparation of reports, mid-training progress reports, training reviews, and surveys, plus tracking of field training completion

One-Stop Service for Faculty

- Review and selection of student application documents
- Review of operation plans and job descriptions submitted by training institutions
- Registration of field training institutions and monitoring of assigned students
- Creation and evaluation of mid-training inspection reports for students

WESS University Field Training Support Solution





One-Stop Service for Training Institutions

- Recruitment of trainees based on selection methods (document screening / interviews / university recommendations)
- Review of student application documents and execution of selection evaluations
- Support for On/Off-line tripartite agreements among universities, training institutions, and students
- Creation and submission of student evaluation forms and attendance records, and issuance of field training participation certificates

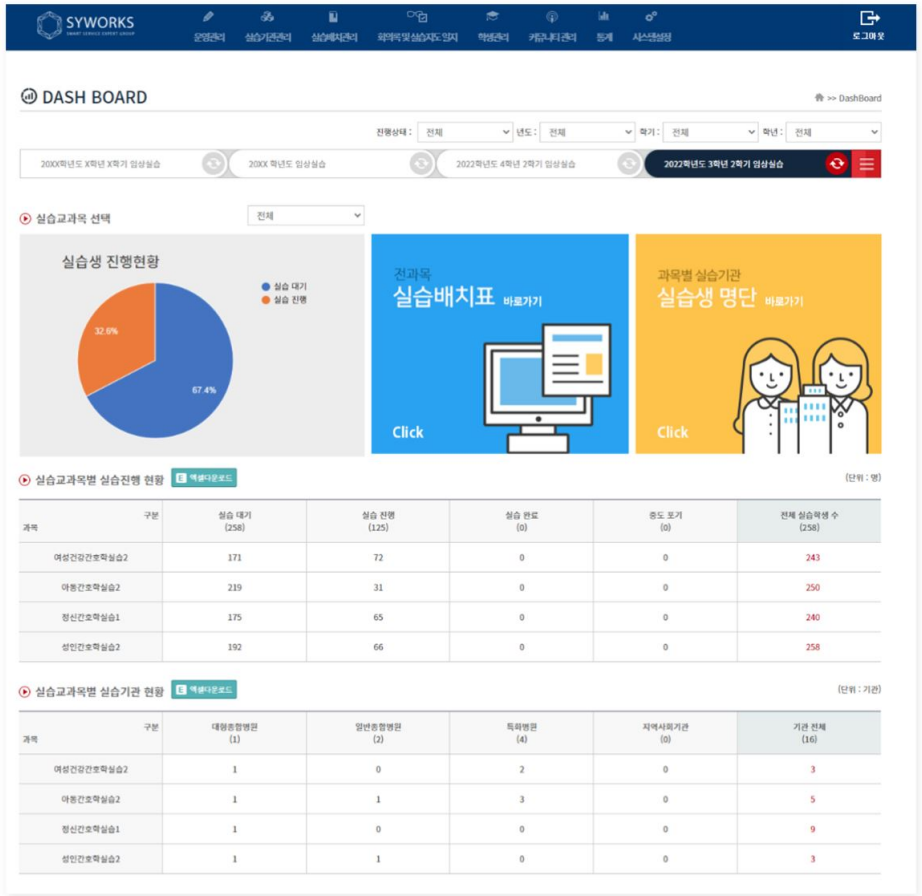
One-Stop Service for Field Training Support Centers

- Establishment of field training semesters and recruitment, registration, and management of participating institutions
- Conducting student demand surveys and managing resumes/personal statements and selection processes
- Pre-training programs for participating students (safety education, workplace sexual harassment prevention training, etc.)
- Support for On/Off-line tripartite agreements among universities, training institutions, and students, and provision of statistical data

Lamp Nursing Clinical Practice Support Solution

Lamp manages the entire nursing clinical practice process in one system.

Lamp is a system that supports nursing students, faculty, clinical practice sites, and support centers throughout the clinical practice process.



Efficient Clinical Practice Management

- Provides processes optimized for the clinical practice operation models of nursing departments nationwide
- Enables systematic online management of multiple clinical practice programs

Automatic Trainee Schedule Generation

- Automatically generates schedules for multiple trainees based on placement conditions
- Reduces the burden of manually assigning students one by one

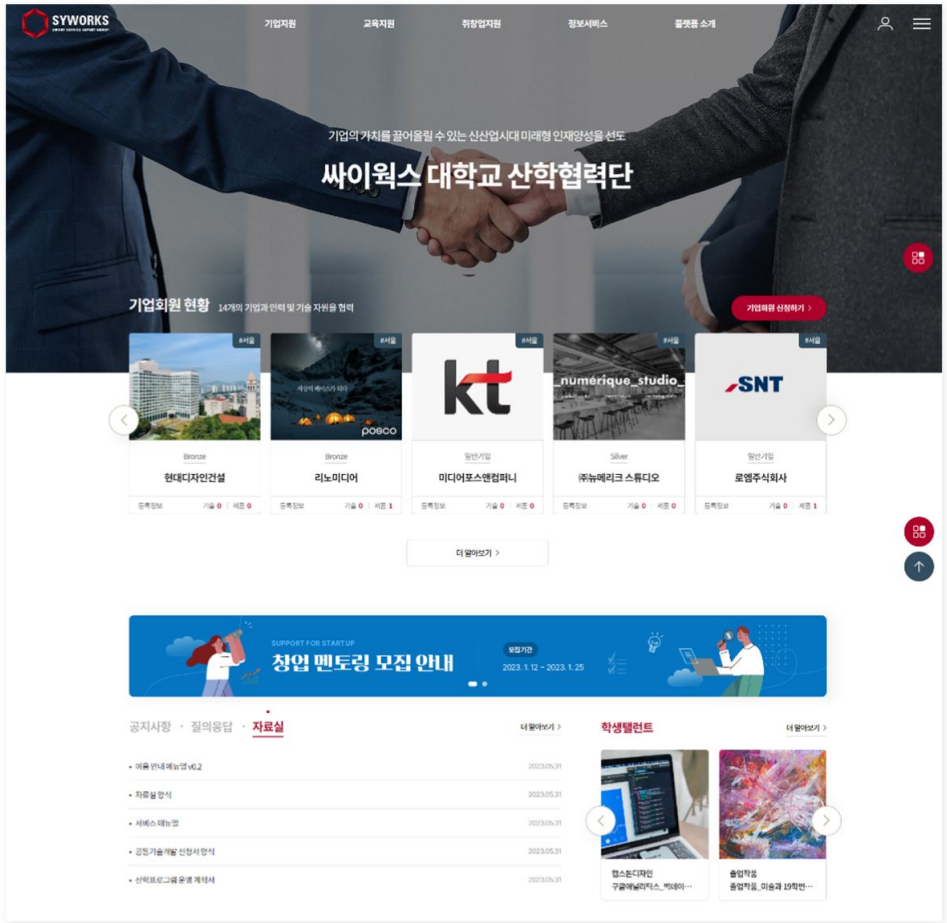
User-Centered and Optimized UX

- Delivers essential clinical practice functions tailored to different user roles
- Allows all users to monitor overall clinical practice status at a glance through a dashboard

InnoBridge Industry-Academic Cooperation Activity Management Solution

A data-driven platform connecting universities and industries for seamless collaboration.

InnoBridge helps universities manage and evaluate their partnerships with industry. It enables them to track and analyze outcomes and use the results to improve their collaboration activities.



Integrated Industry–University Collaboration Services

· Comprehensive services supporting industry–university collaboration, including corporate support, education, employment, entrepreneurship, and information services.

Demand-Centered Service Implementation

· A user-centered service model that promotes active collaboration among students, faculty, and industry partners.

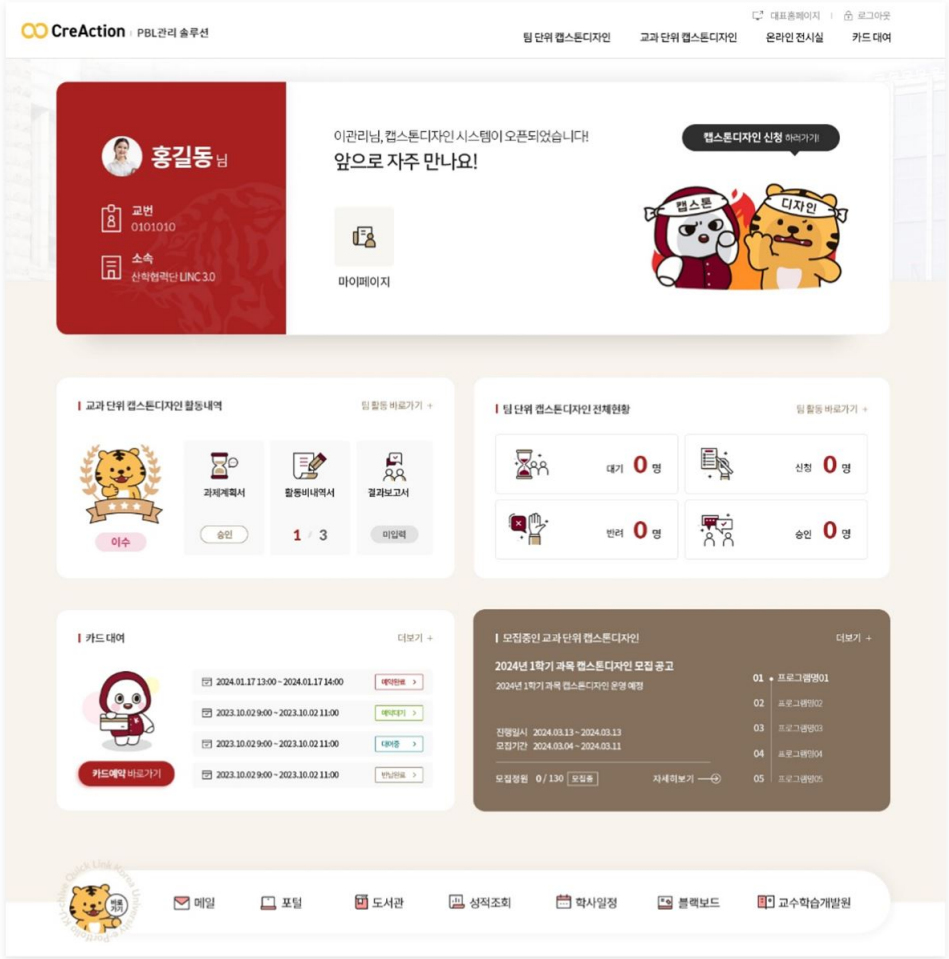
Customized Services

· System customization services tailored to each university's characteristics to ensure effective operation.

CreAction PBL Management Solution

Manage all project stages involving students, faculty, and support centers in one integrated online environment.

From project registration and team formation to budget requests and final report submission, the entire project-based learning lifecycle is transparently monitored and centrally managed. The system helps students and faculty collaborate and makes it easier to run programs efficiently.



One-Stop Online Management

- Online management of the entire capstone design process, from project registration to evaluation
- Online operation framework based on the university's capstone design support center

Integrated and Systematic Operation Management

- Integrated management system to improve participant satisfaction and ensure program quality
- Unified monitoring and management of team formation, progress, budget requests/execution, and report submission

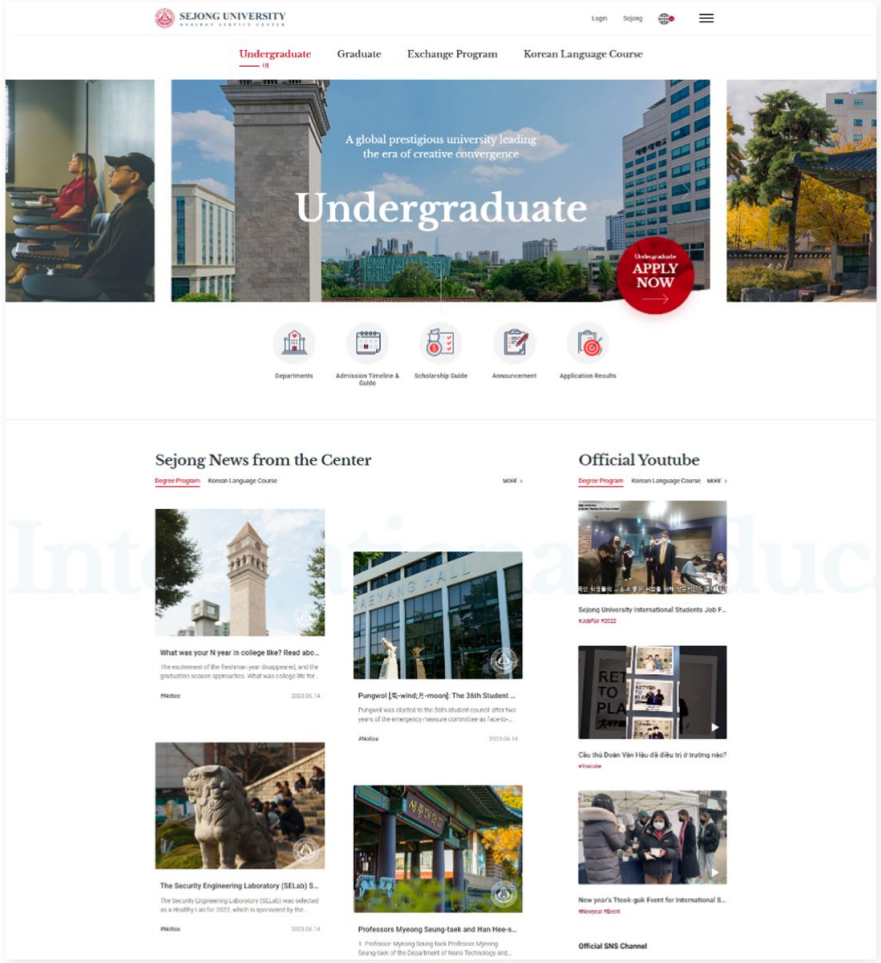
Data-Driven Statistical Services

- Systematic data management and analysis through project tracking, performance aggregation, and statistics
- Statistics to support the Ministry of Education's public disclosure process

UniLink International Student Management Solution

An integrated system supporting international students from admission to campus life.

UniLink helps institutions manage online applications for undergraduate and graduate admissions, exchange programs, and Korean language programs. It streamlines application processing and visa administration for international students.



International Online Admission Support

- Online submission of application forms previously handled offline
- Real-time tracking of application progress and admission results after registration
- Multilingual services to enhance usability for international applicants

Convenient Payment & Integrated Management

- Support for overseas payments through integration with domestic and international payment systems
- Setup and management of application fee and tuition payments
- Integrated admission management for universities, graduate schools, exchange students, and Korean language programs

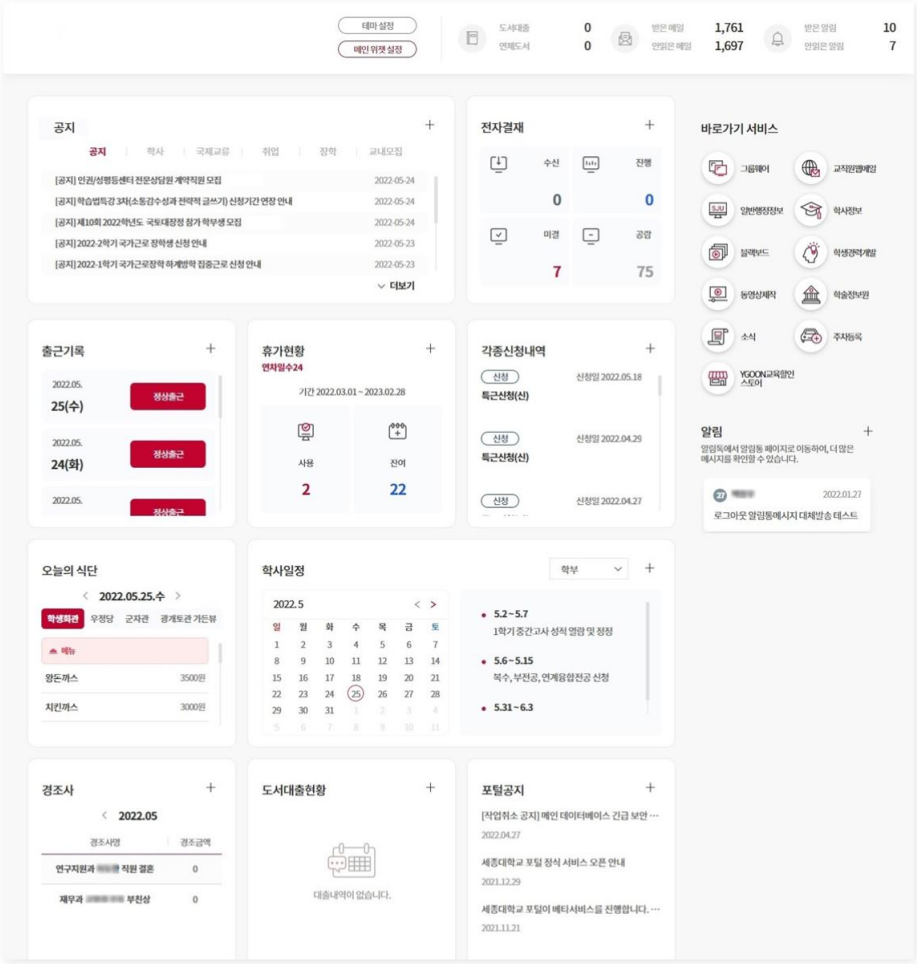
Agency & Applicant Management

- Management support for international student recruitment through partner agencies
- Systematic management of applicant and admitted student information

UniGate University Business Portal Solution

An integrated portal offering academic and administrative information and personalized services to students, faculty, and staff.

By applying the latest responsive web technologies, the system delivers an optimized user experience across all devices. It supports personalized content and tailored notifications based on user roles, while maximizing accessibility through SSO integration with major campus systems. In addition, it offers community features for active communication and practical tools for efficient task management.



Personalized User Experience

- Improved usability through modern design technologies
- Role-based personalized portals and customized content
- Group-specific screen configurations and multilingual support

Enhanced Communication & Collaboration

- Integrated bulletin boards for information sharing
- Unified notification system for announcements and schedules
- Support for meetings, scheduling, and café-style communication features

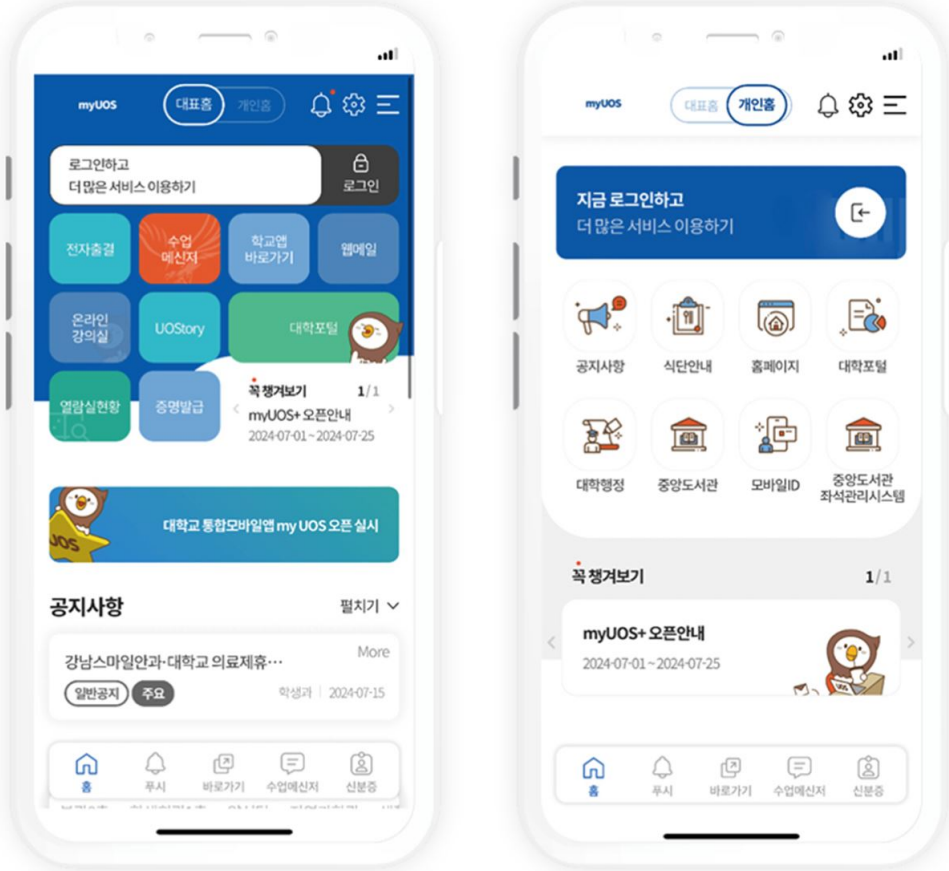
Integrated Portal & System Connectivity

- Unified portal management through SSO integration with campus-wide systems
- Integrated access to academic and administrative services
- Quick Menu and multi-tab navigation for easy access

CampusOn University Mobile Solution

An integrated mobile application providing customized functions based on user roles (Students/Faculty & Staff).

CampusOn gives students, faculty, and staff access to personalized academic and administrative information on their phones. Push notifications, class messaging, and a digital directory make everyday campus tasks easier.



Customized Mobile Campus Experience

- Provides personalized information for each user through an intuitive UI
- Configures a customized home screen for academic and administrative information
- Enhances usability with purpose-based main home and personal home tabs

Real-Time Communication Support

- Supports in-class messaging to improve student engagement and enable smooth communication
- Delivers real-time notifications (PUSH) for key campus information
- Sends personalized messages via multiple channels, including SMS and E-mail

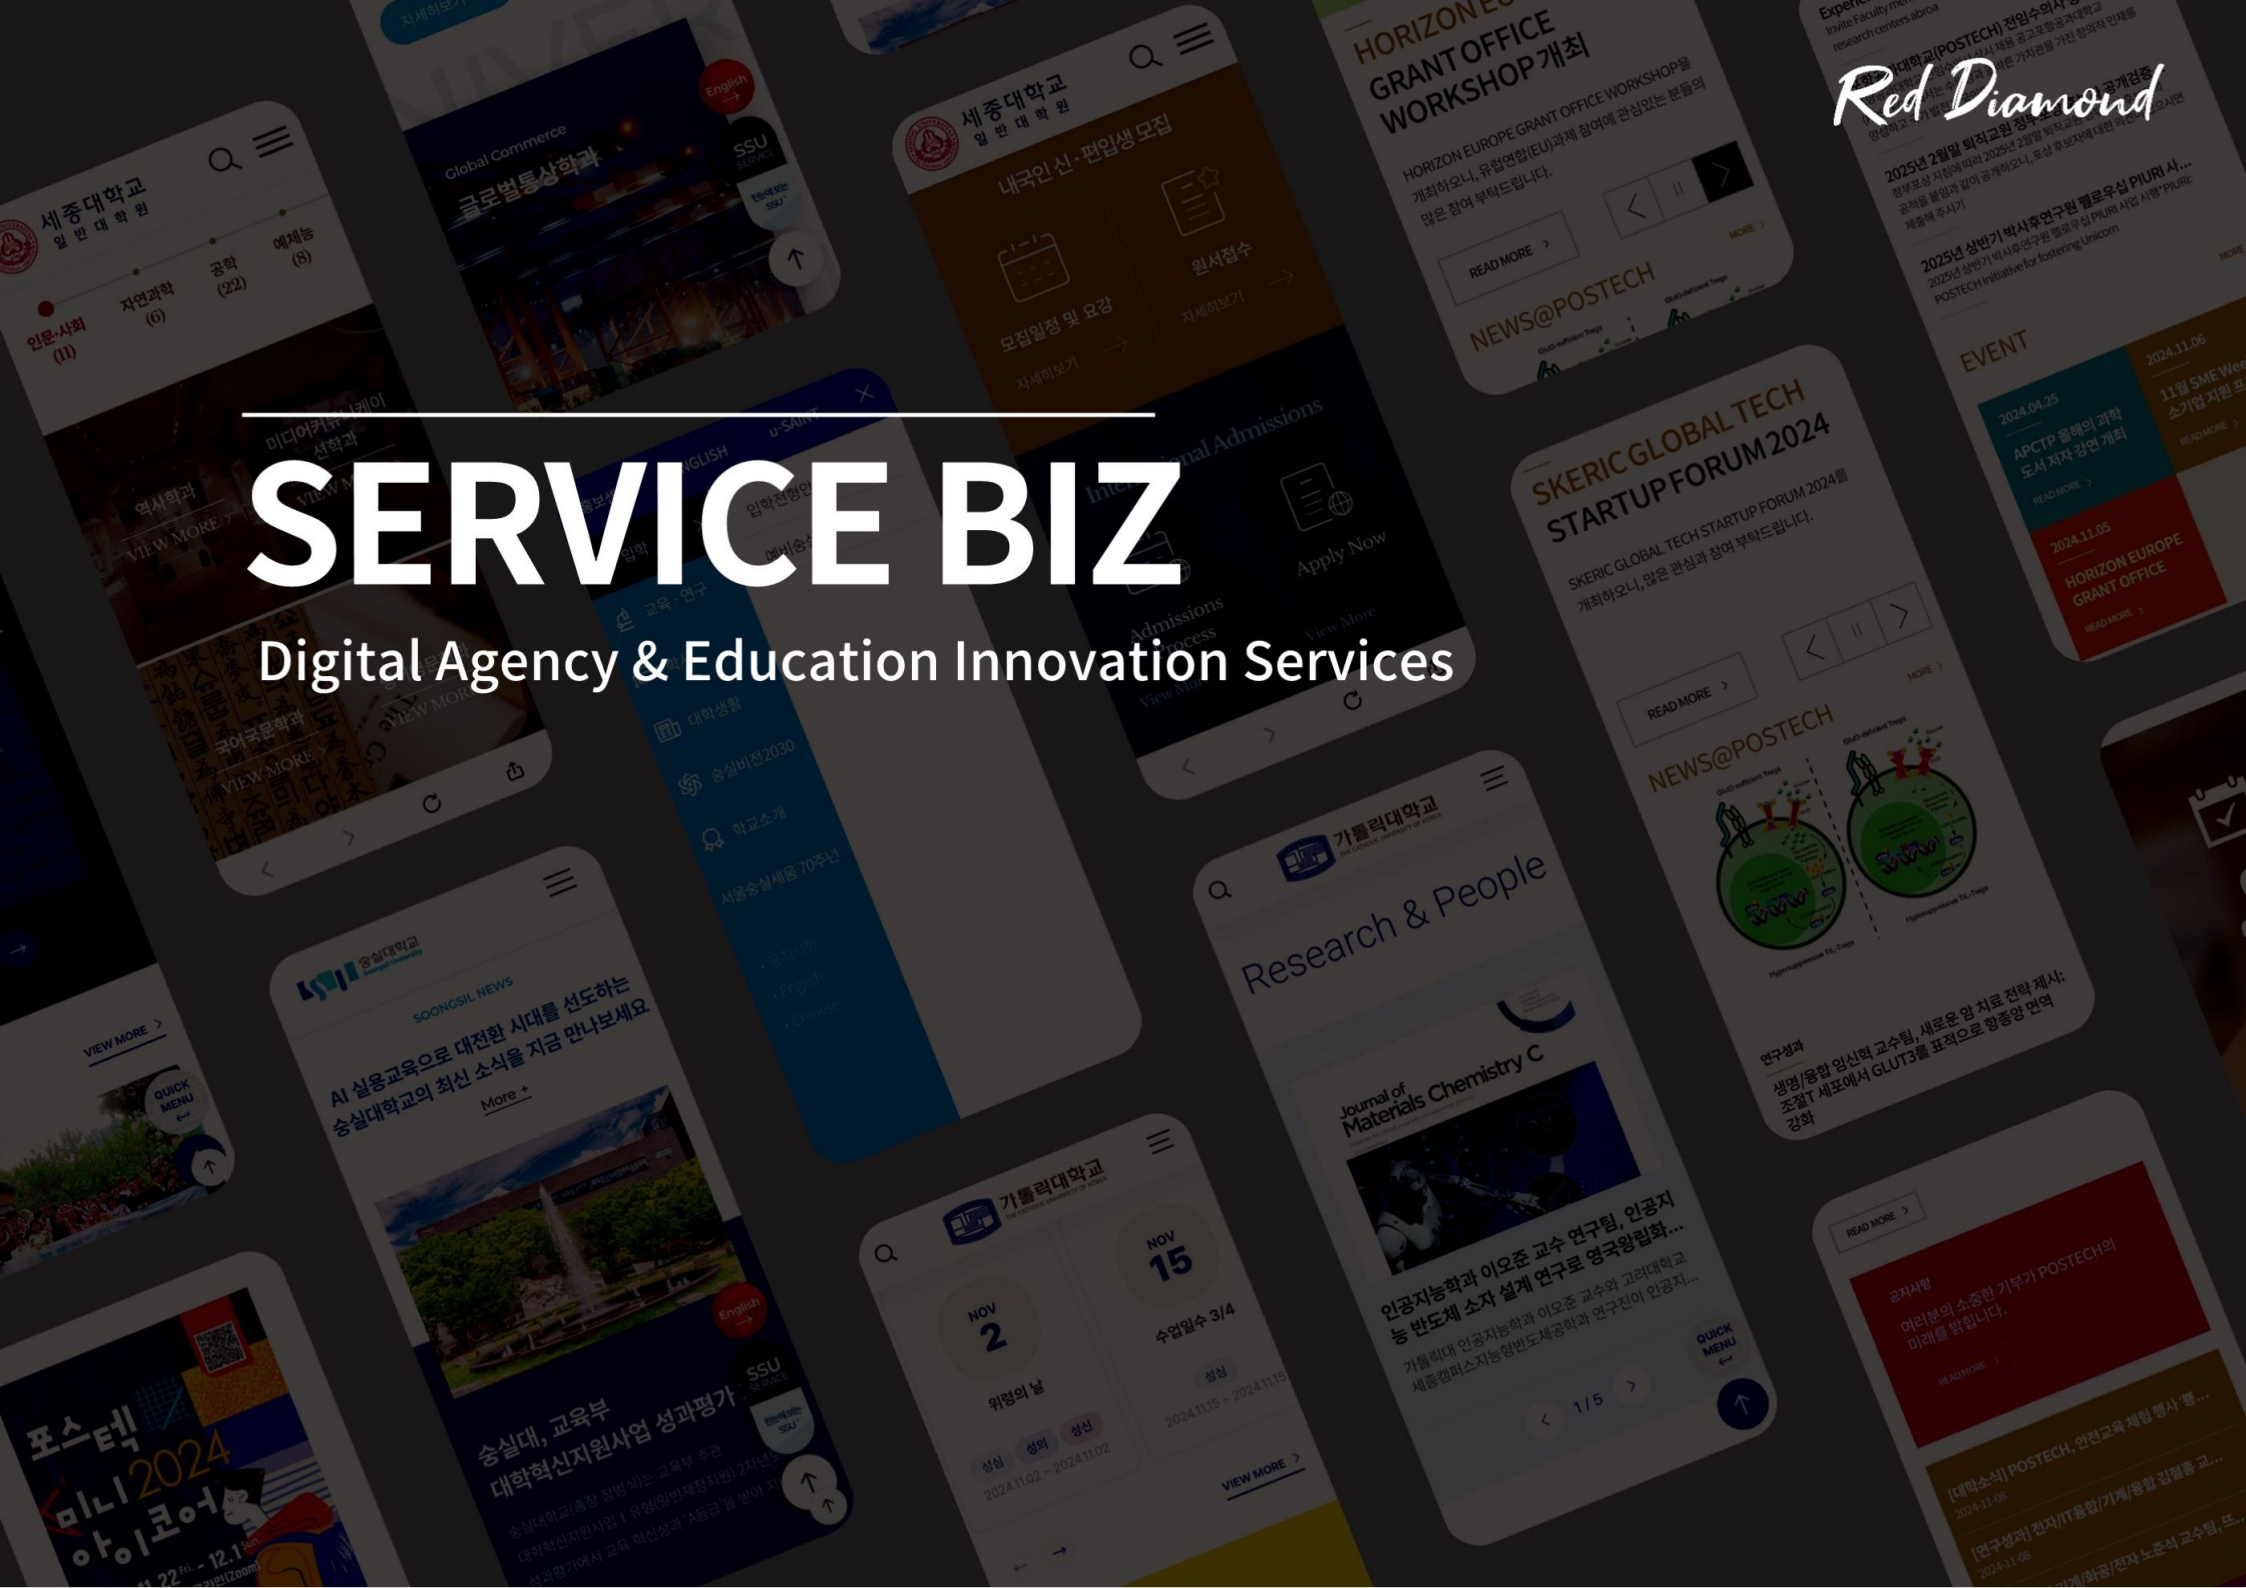
Integrated Access and Connectivity

- Enables integrated use of various campus mobile services, such as mobile ID and the central library
- Allows seamless navigation across campus mobile sites through single sign-on (SSO)
- Provides a digital directory for centralized management and quick access to faculty and staff information

Red Diamond

SERVICE BIZ

Digital Agency & Education Innovation Services



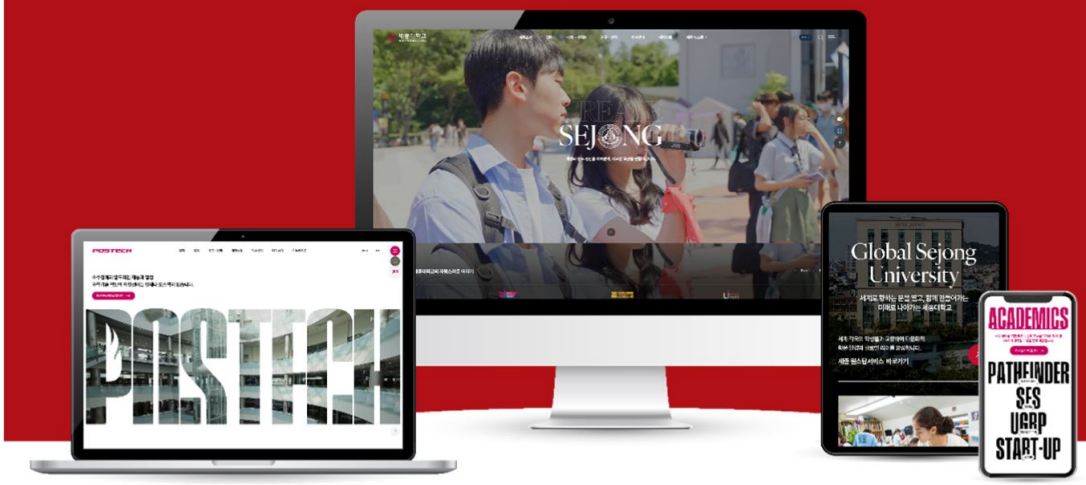
Red Diamond

Like the most beautiful and enduring red diamond, we design unparalleled digital value that cannot be replicated.

With relentless passion and innovation, SYWORKS refines each client's business potential into a one-of-a-kind red diamond. From web and app development to stable long-term maintenance, we combine distinctive technical expertise with creative excellence to bring your digital value to life in its most brilliant and impactful form.

Red Diamond

This is SYWORKS' Digital Creative Service Brand—dedicated to delivering the most original and distinctive digital creative experiences for our clients.



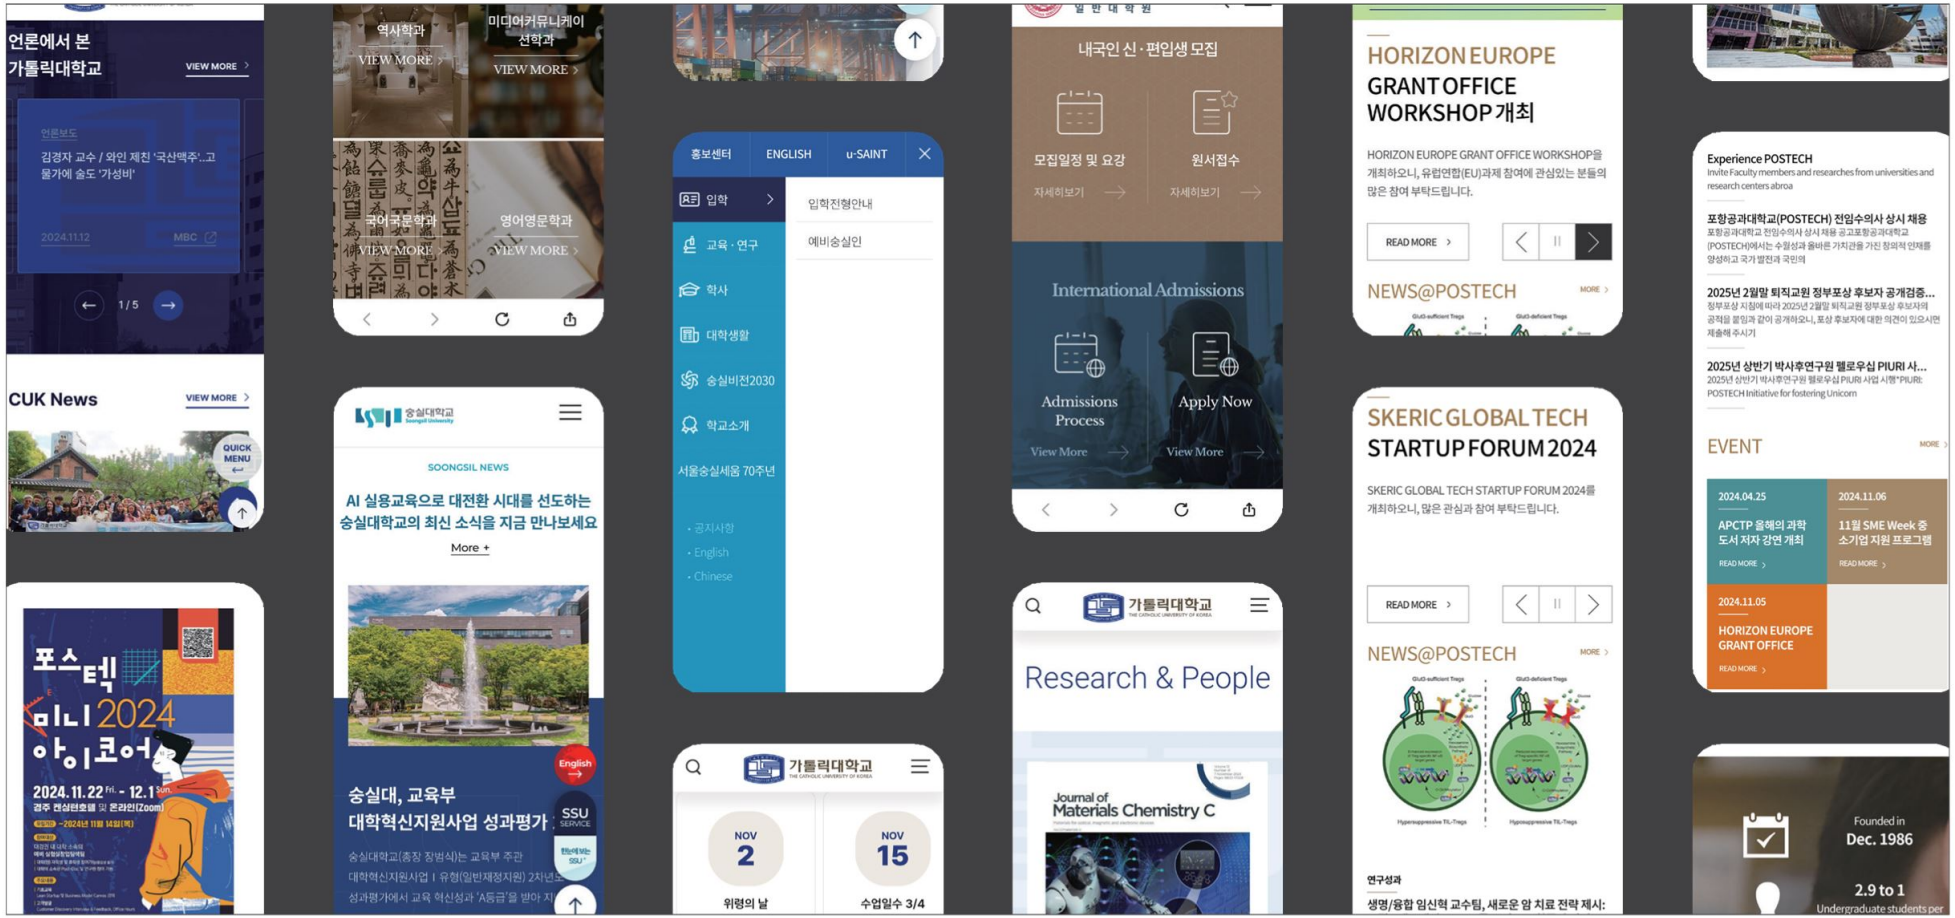
Red Diamond Digital Agency Services

Web & App Development Services

We provide one-stop services for web and mobile app design, development, and deployment, combining the latest design trends with stable system architecture.

Design, Content & IT Consulting Services

We provide UI/UX design, content development, and IT consulting tailored to each client's needs. By enhancing usability and intuitiveness, we help improve overall user experience and service quality.



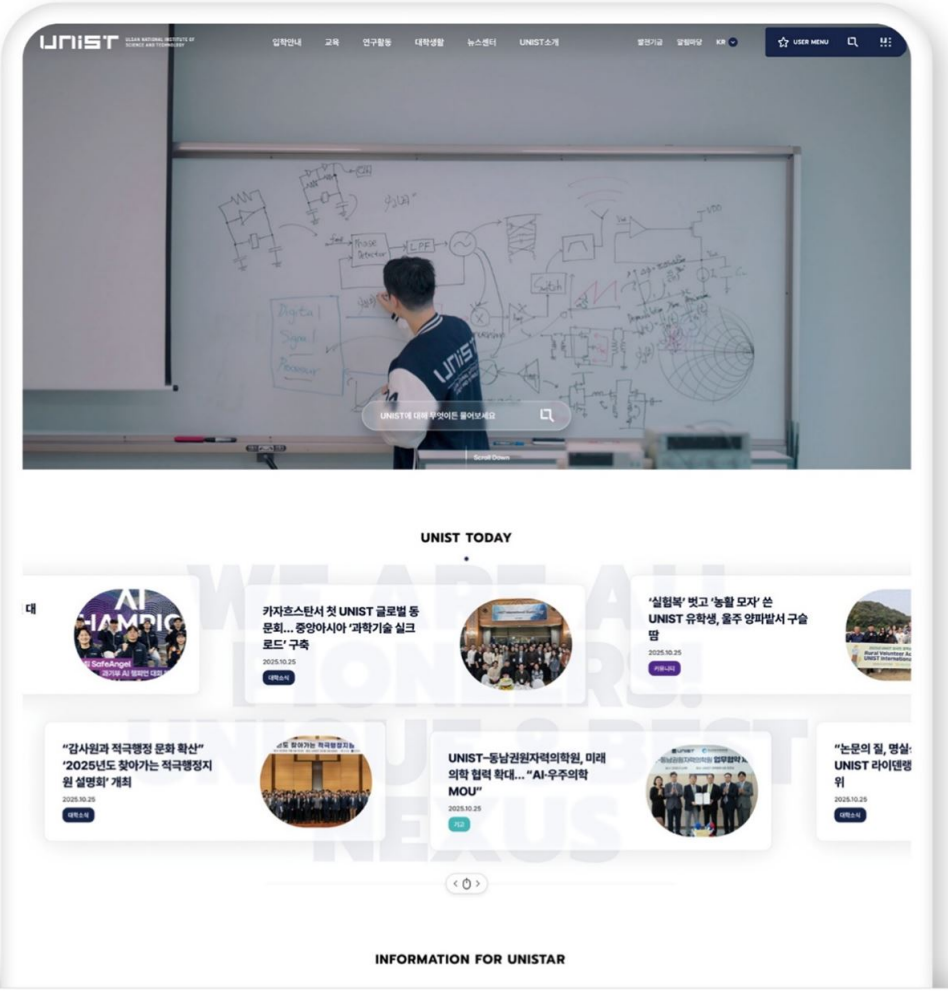
Digital Agency Services
Project Showcase

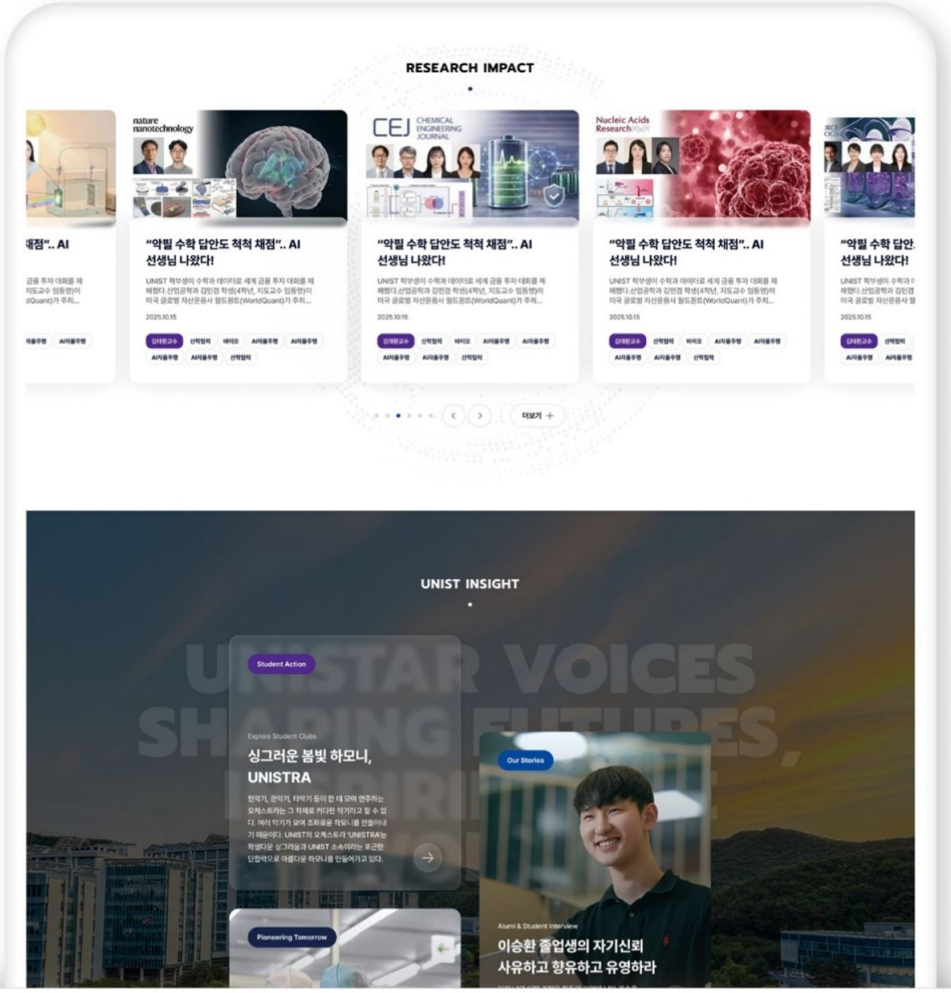
UNIST

ICT AWARD KOREA 2026 GOLD PRIZE

We built an integrated flagship website that captures UNIST's research competitiveness and future vision.

We built a hub-style flagship website that unifies UNIST's scattered research and PR content. Researcher profiles and research achievements are presented systematically, and a user-centered information structure helps users in Korea and abroad find information efficiently.





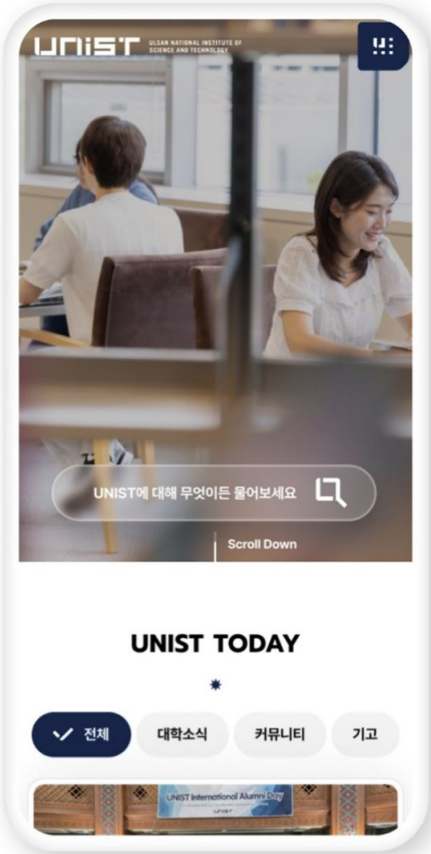
Digital Agency Services
Project Showcase

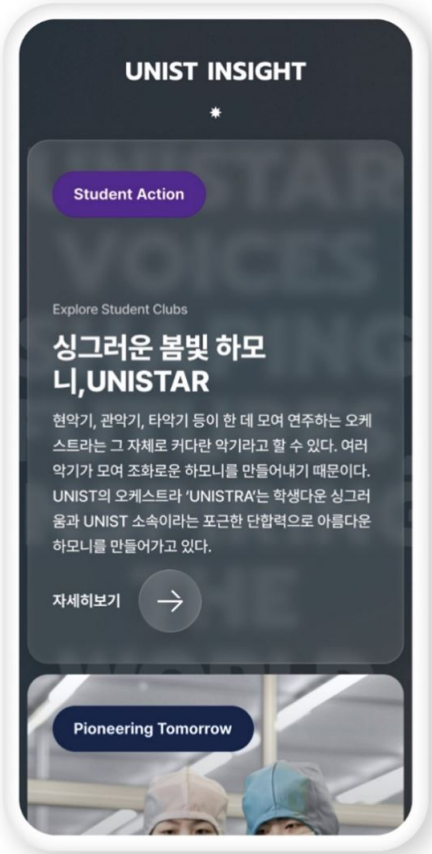
UNIST

ICT AWARD KOREA 2026 GOLD PRIZE

We designed user-centered mobile screens that make key content intuitive to explore.

Card-based layouts and an intuitive information structure make it easy to explore news, research achievements, events, campus life and more by purpose. A design that reflects UNIST's brand identity and a mobile-optimized UI let users check key information quickly and conveniently.





Digital Agency Services
Project Showcase

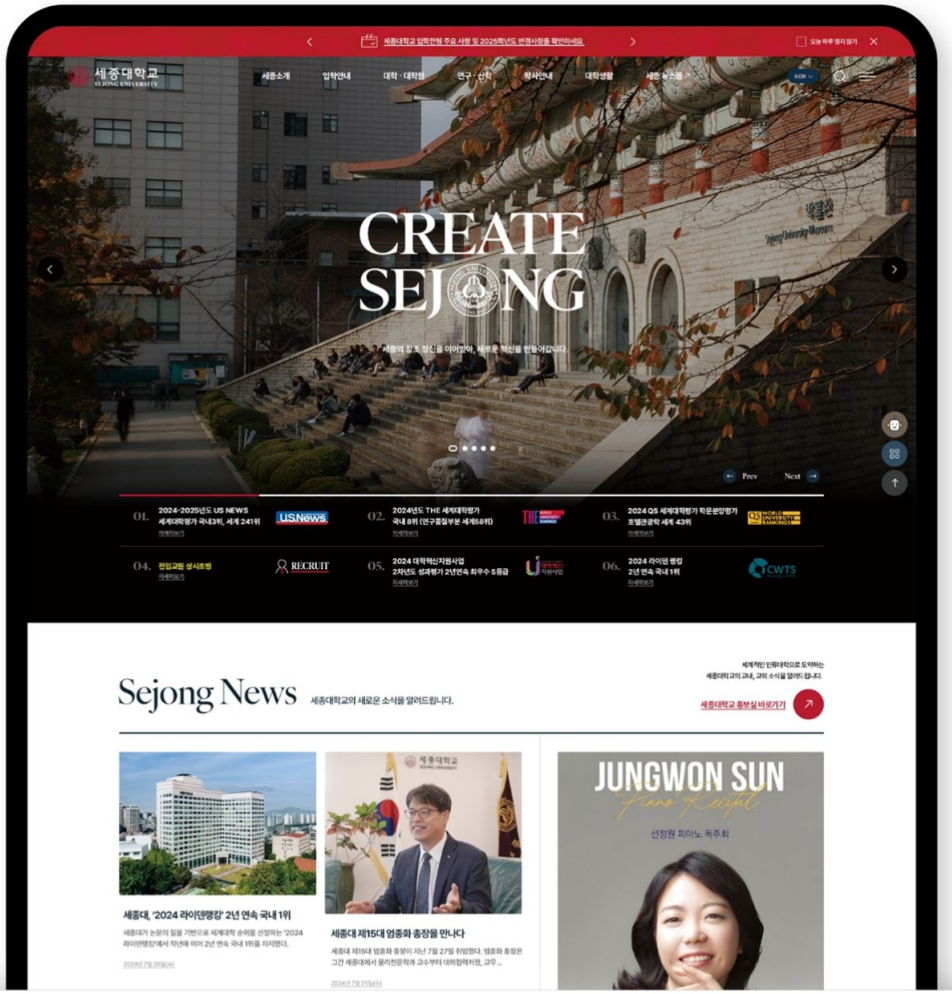
Sejong University

ICT AWARD KOREA 2026 BRONZE PRIZE

WEB AWARD

We built a next-generation integrated web service to support Sejong University's global vision.

The official Sejong University website was fully redesigned with a focus on international collaboration news and research achievements, in line with global education trends. By incorporating the latest mobile environments and AI technologies, the platform maximizes user convenience. Its intuitive design and advanced information architecture effectively communicate the university's brand value and global presence.



Digital Agency Services
Project Showcase

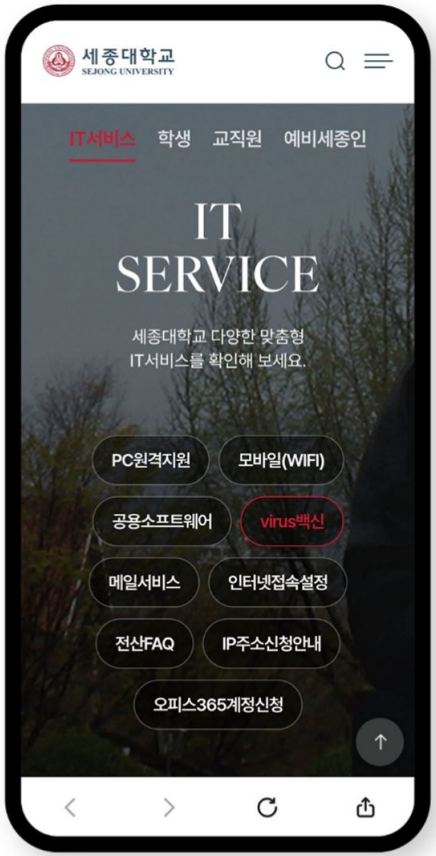
Sejong University

ICT AWARD KOREA 2026 BRONZE PRIZE

WEB AWARD

We provide a smart communication platform through user-centered, intuitive UI design and mobile optimization.

By implementing a responsive web environment that enables real-time sharing of academic information and campus news, we significantly improved information accessibility for users. By integrating fragmented information and visualizing the university's unique identity, we successfully delivered a stable and advanced digital campus infrastructure that is accessible and easy for everyone to use.



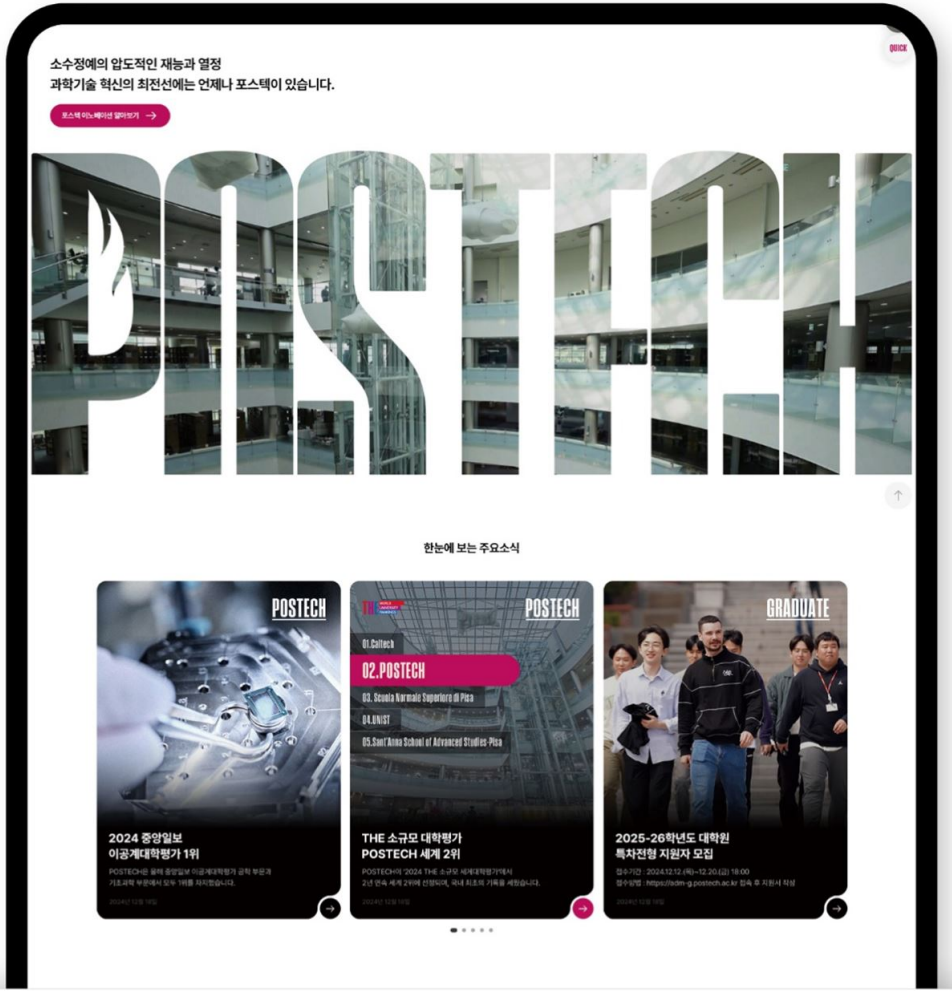
Digital Agency Services
Project Showcase

POSTECH

WEB AWARD

We built a future-oriented intelligent integrated information platform for a research-driven university.

To effectively disseminate POSTECH's outstanding research capabilities and academic achievements, we established an integrated management framework based on the latest web standards. The platform enhances personalized services reflecting the needs of researchers and students, while providing a secure and scalable system environment aligned with global standards.



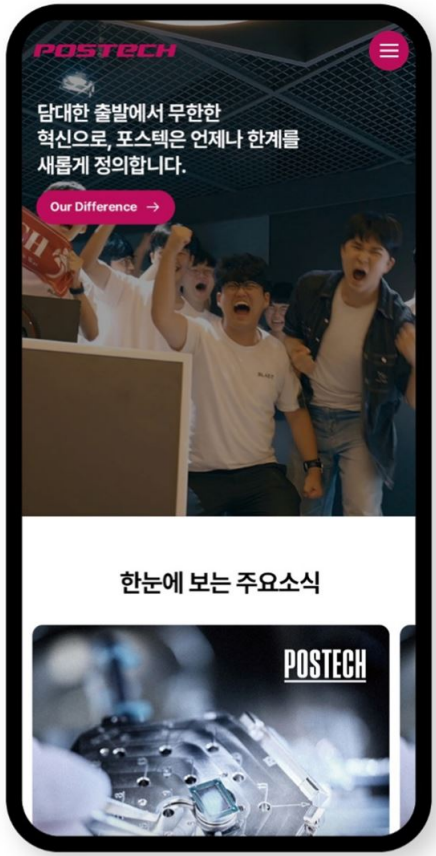
Digital Agency Services
Project Showcase

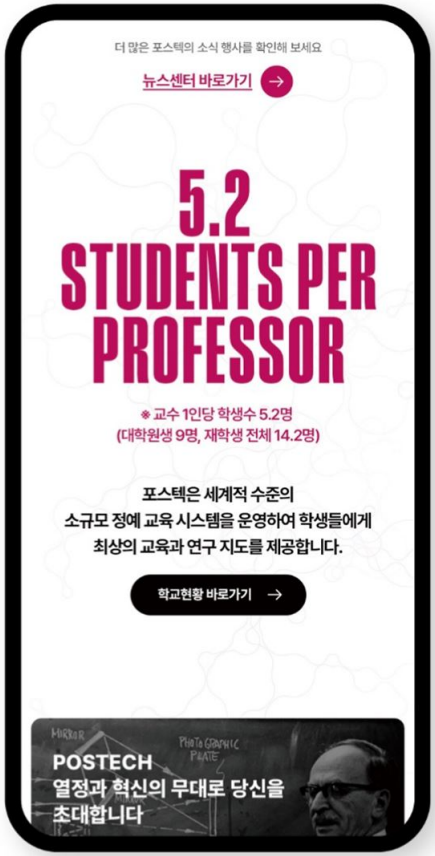
POSTECH

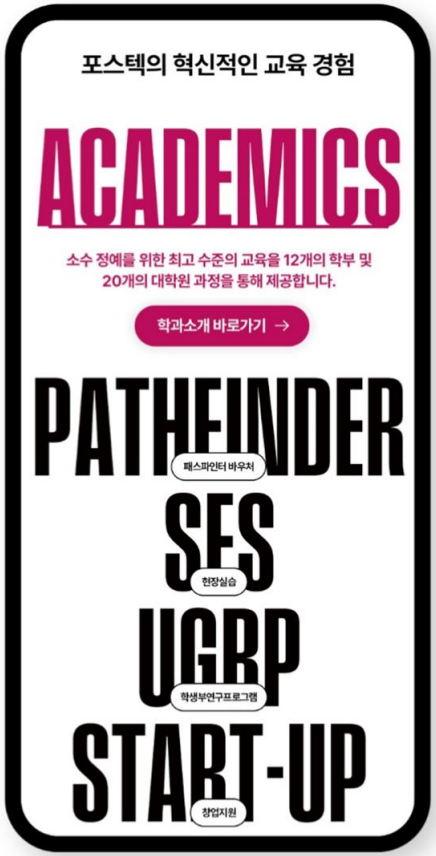
WEB AWARD

We provide a system that accelerates data-driven academic management and research administration digitization.

The homepage's main screen features bold, impactful visuals designed to effectively convey POSTECH's vision and values. This allows visitors to intuitively understand the university's identity and goals at a glance, while visually experiencing POSTECH's innovative future and its stature as a global leader.







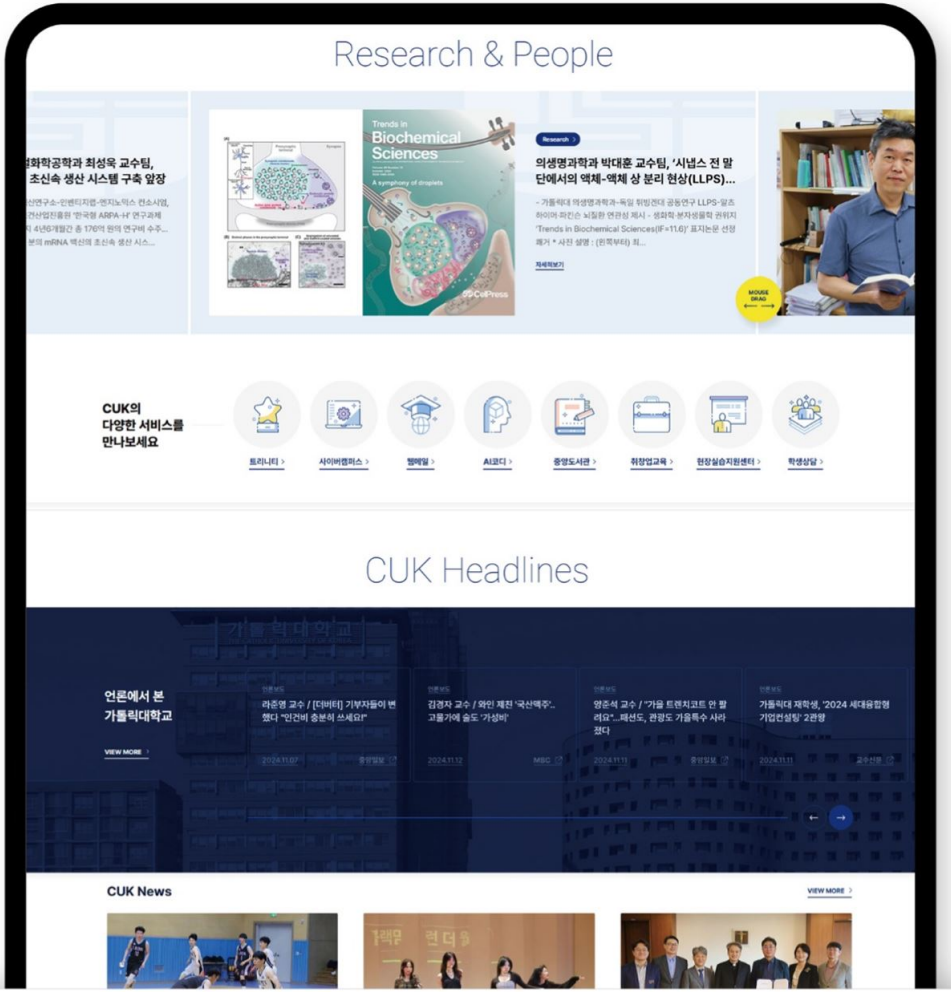
Digital Agency Services
Project Showcase

The Catholic University of Korea

WEB AWARD

A web platform supporting student growth and seamless communication aligned with the university's philosophy.

With a refined design that enhances brand value and an intuitive menu structure based on user behavior analysis, information accessibility has been significantly improved. The platform integrates essential academic administration and campus life content, and applies responsive web technology to deliver an optimized experience across all devices—creating a service that satisfies the entire university community.



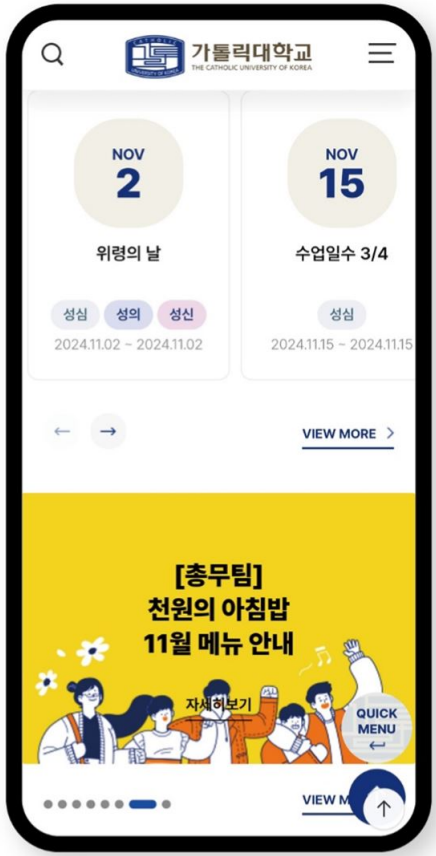
Digital Agency Services
Project Showcase

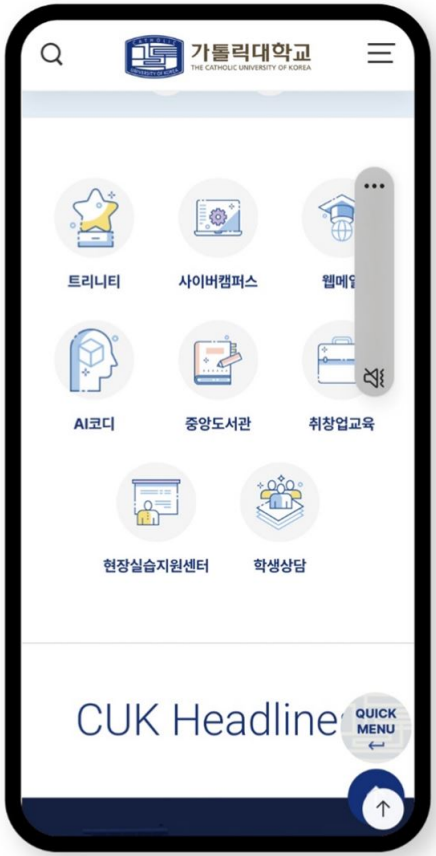
The Catholic University of Korea

WEB AWARD

We upgraded the university's systems to improve administrative processes and strengthen its public outreach.

We established an integrated data management framework that connects fragmented educational information, ensuring operational consistency and data reliability. Enhanced search functions and intelligent features such as personalized notifications improve the accuracy of information delivery, while continuous quality management supports an educational infrastructure that fosters creative talent.





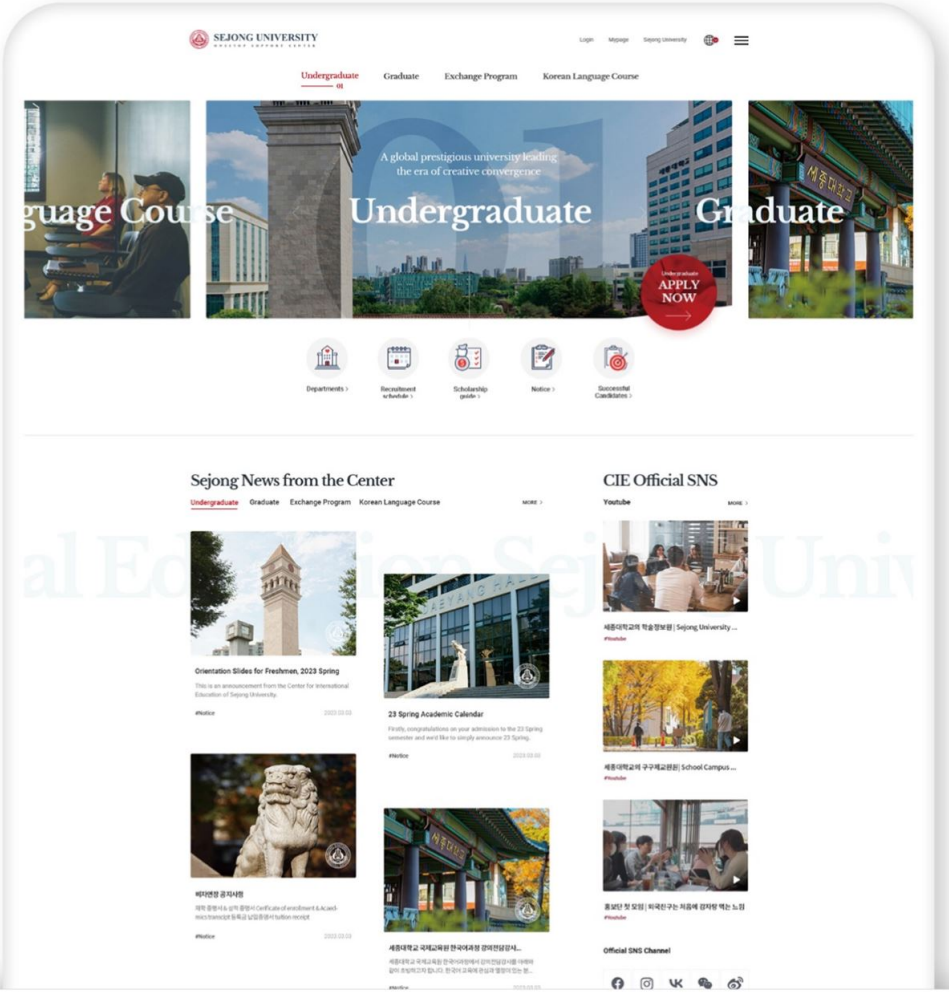
Digital Agency Services
Project Showcase

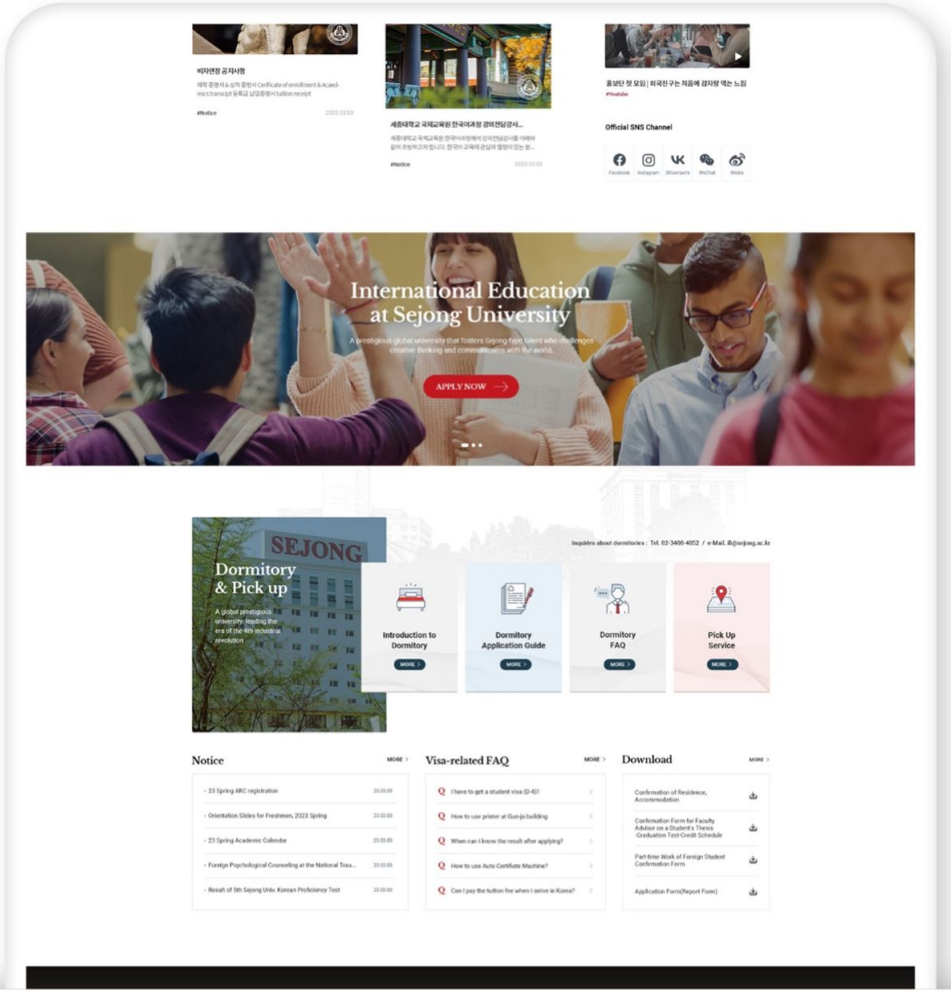
Sejong University One-Stop Support Center

WEB AWARD

We have created a one-stop service that maximizes student convenience and administrative efficiency.

By consolidating student support services, which were previously dispersed online and offline, into a single platform, we have ensured faster and more accurate handling of inquiries. We designed intuitive, user-centered processes to increase students' satisfaction with administrative services, and implemented a digital service model that dramatically improves operational efficiency for administrative departments through systematic management functions.





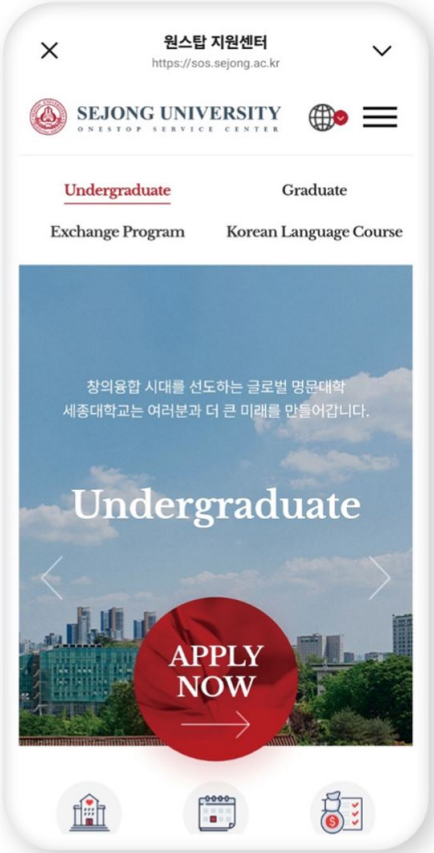
Digital Agency Services
Project Showcase

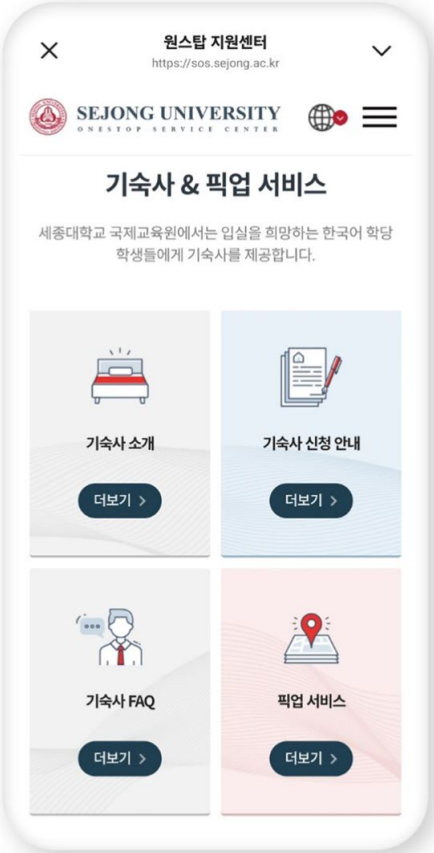
Sejong University One-Stop Support Center

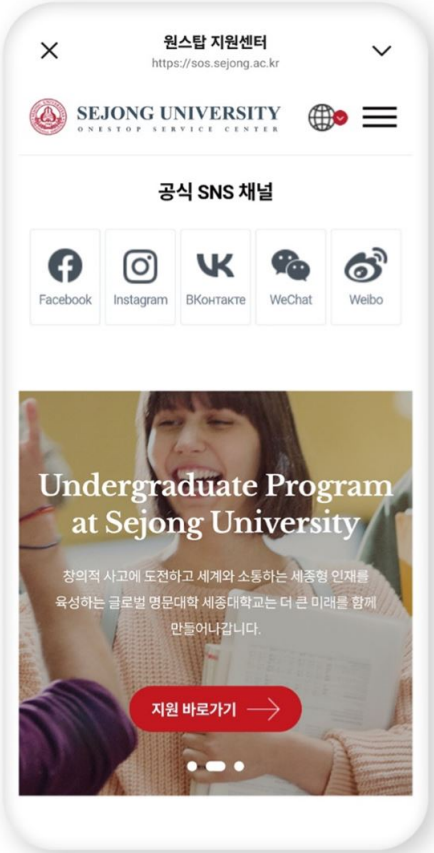
WEB AWARD

We used real-time communication and data-driven personalized support to create a student-centered campus experience.

By enabling real-time monitoring of inquiry handling and enhancing automated responses to frequently asked questions, we maximized the convenience of accessing information. We analyzed students' key usage patterns to optimize menu layouts, and built a high-quality integrated support system that allows anyone to easily and quickly access administrative services on a secure and stable platform.







Digital Agency Services
Project Showcase

Soongsil University

WEB AWARD

The website showcases Soongsil University's founding ideals of truth and service and conveys the university's brand identity and sense of pride.

We designed a modern interface and user-centered information architecture that harmoniously reflect Soongsil University's tradition and innovative vision. An optimized content management system was implemented to effectively disseminate the university's key news and research achievements, while a responsive web environment delivers a consistent and convenient digital experience to all members.

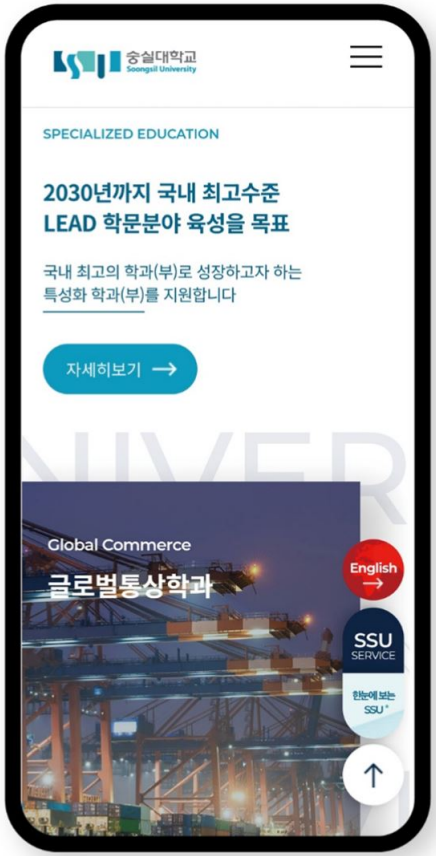
Digital Agency Services
Project Showcase

Soongsil University

WEB AWARD

We promote active engagement and communication through enhanced mobile access and advanced search features.

With an intuitive UI based on user behavior analysis, we provide an intelligent search environment for quickly finding information. Strengthened SNS integration and interactive content create seamless communication between the university and students, while standardized web technologies ensure a stable, efficient, and sustainable system.



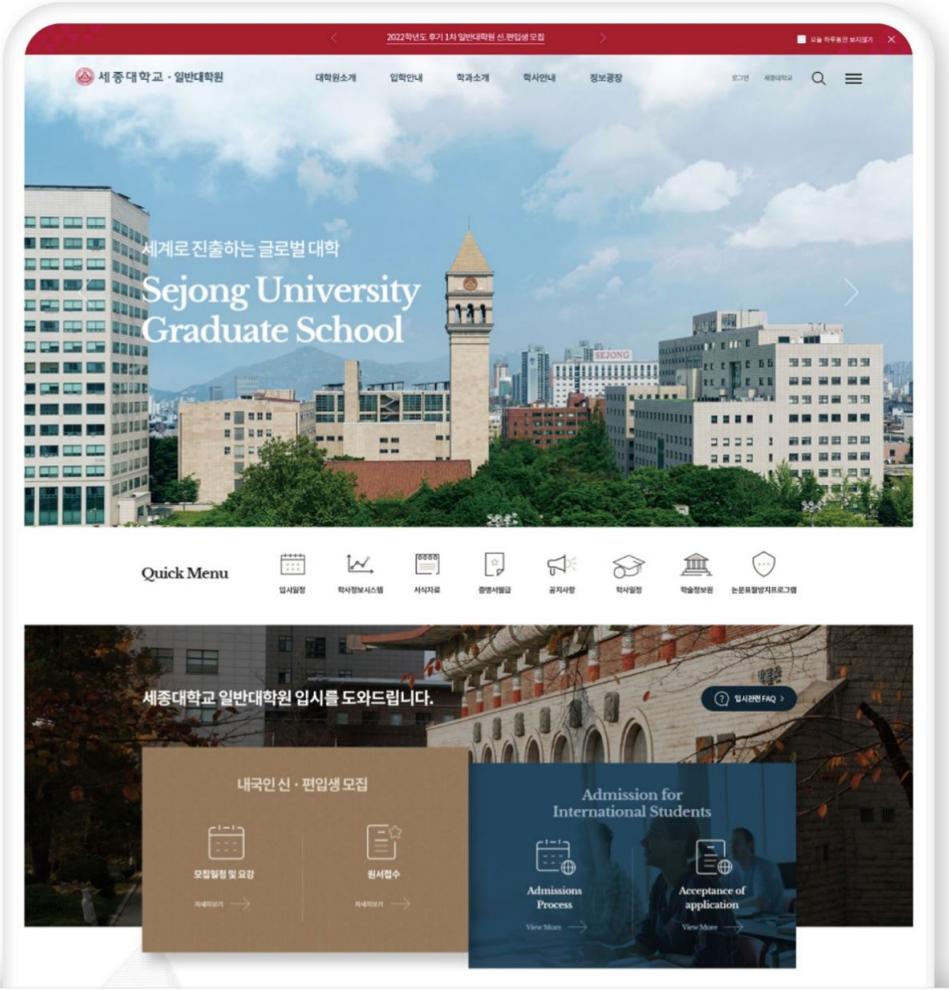
Digital Agency Services
Project Showcase

Sejong University Graduate School

WEB AWARD

We established an advanced, intelligent integrated information platform to cultivate professional research talent.

To efficiently disseminate research outcomes and academic information, the website was revamped using the latest web standards. Personalized services were enhanced to reflect the needs of researchers and students, while an advanced information architecture and intuitive design provide an optimal environment to effectively showcase the graduate school's expertise and global research capabilities.



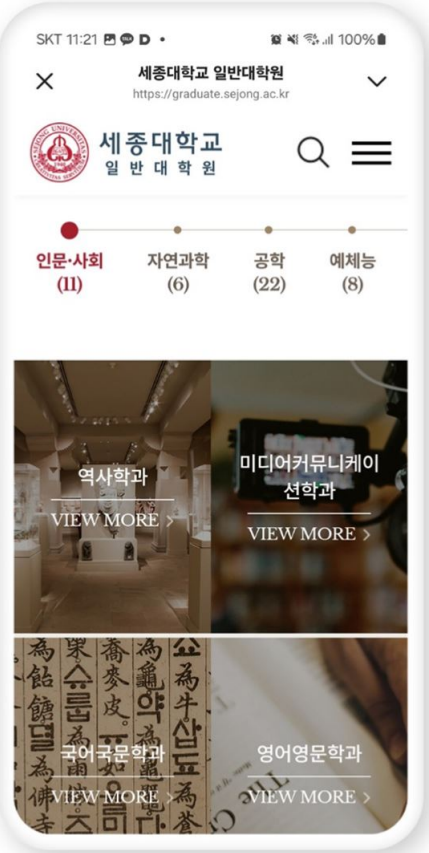
Digital Agency Services
Project Showcase

Sejong University Graduate School

WEB AWARD

We provide a smart research communication channel through intuitive, user-centered UI and mobile optimization.

A responsive web environment enables real-time sharing of academic administration data and research news, dramatically improving information accessibility for all members. A systematic content management system allows for rapid updates, while a stable infrastructure ensures high-quality educational administration services.



Digital Agency Services
Project Showcase

Sejong Cyber University

WEB AWARD

We developed an intelligent, user-centered web service for an optimal online learning environment.

Through a sophisticated design that visualizes Sejong Cyber University's brand value and an intuitive menu structure, we enhanced the quality of remote education services. Personalized content placement, based on analysis of learners' behavior patterns, maximizes navigation convenience, while responsive web technology ensures an optimized experience across all devices.

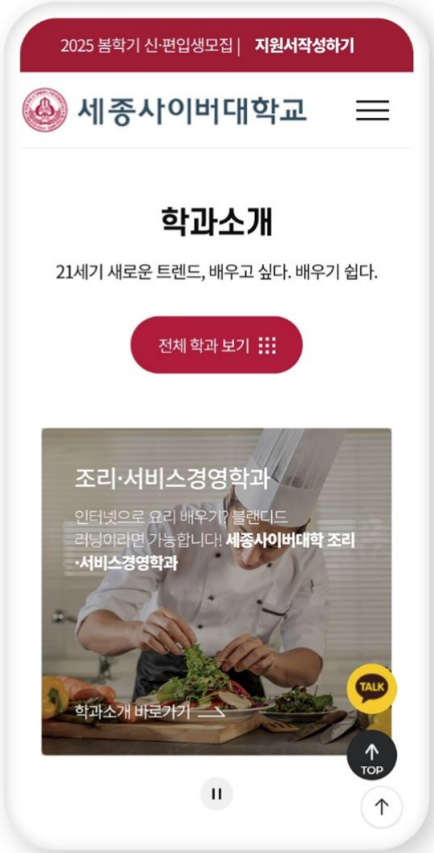
Digital Agency Services
Project Showcase

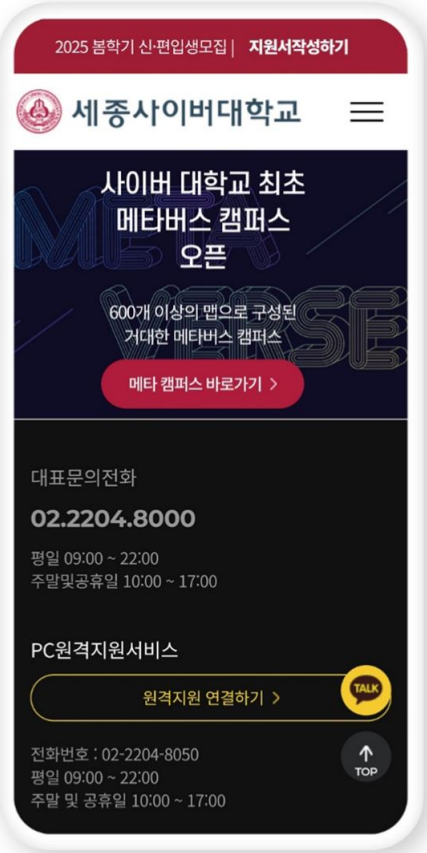
Sejong Cyber University

WEB AWARD

We built a reliable online learning environment with advanced infrastructure and stable operations.

To ensure uninterrupted service even under high traffic, server infrastructure was optimized and security systems strengthened. Integrated management features support the entire learning cycle, from admissions guidance to course registration, enhancing operational efficiency, while continuous quality management underpins innovation in remote education.





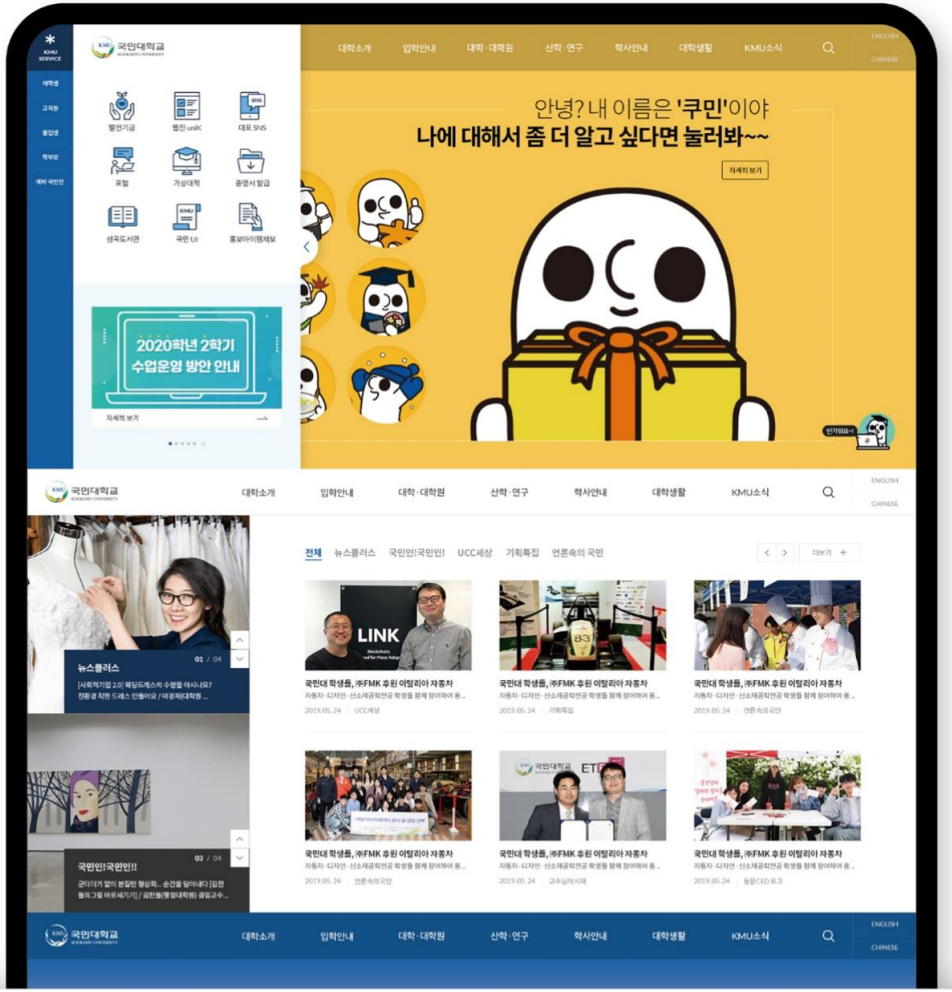
Digital Agency Services
Project Showcase

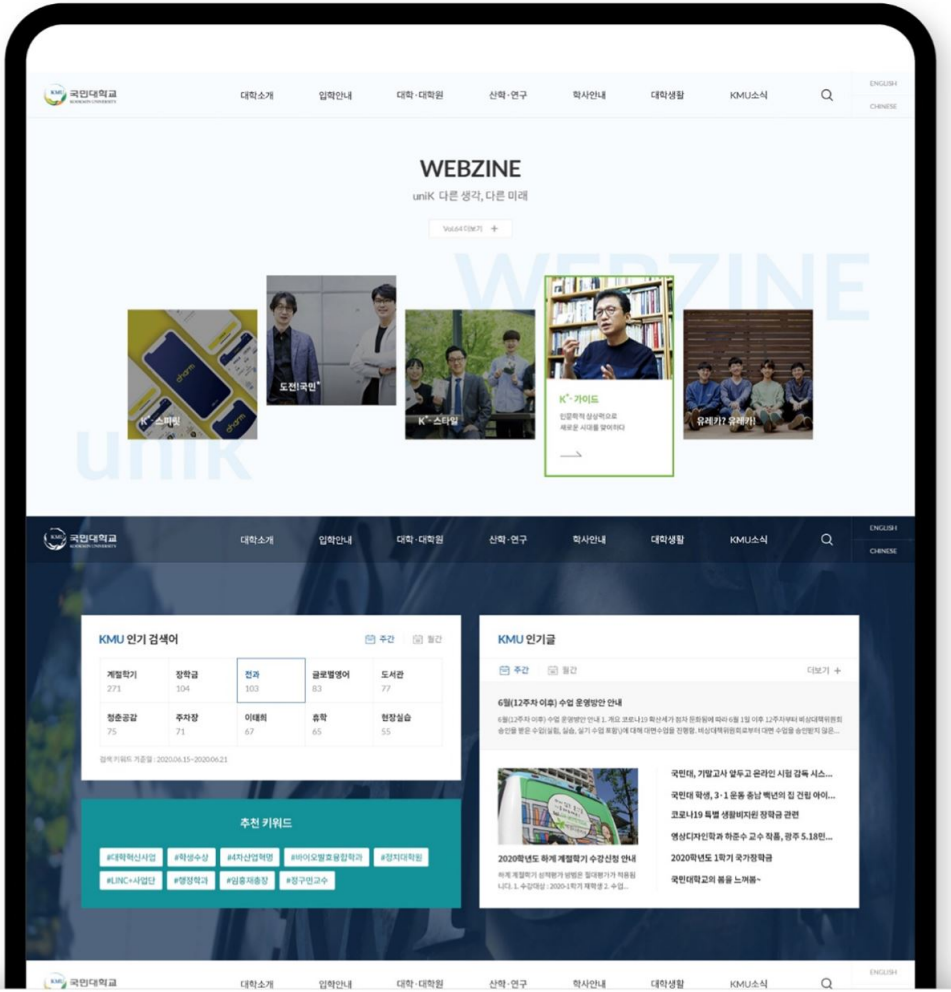
Kookmin University

WEB AWARD

We enhanced Kookmin University's brand through creative design and advanced information architecture.

A modern UI/UX, embodying the university's founding principles and innovative vision, delivers a consistent digital brand experience to users. By adopting the latest web standards and a responsive engine, we improved mobile accessibility, while a user-centered information architecture effectively communicates the university's key achievements.





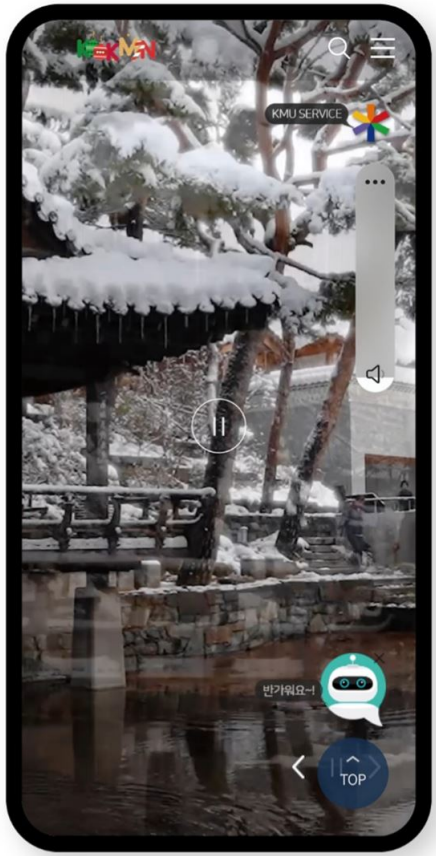
Digital Agency Services
Project Showcase

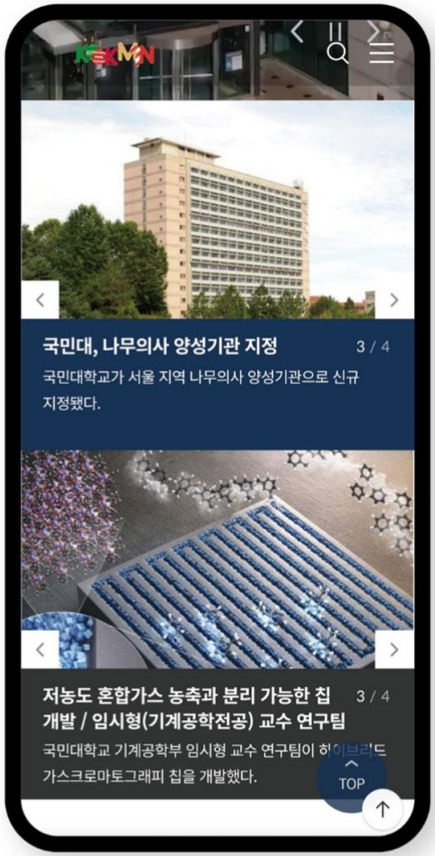
Kookmin University

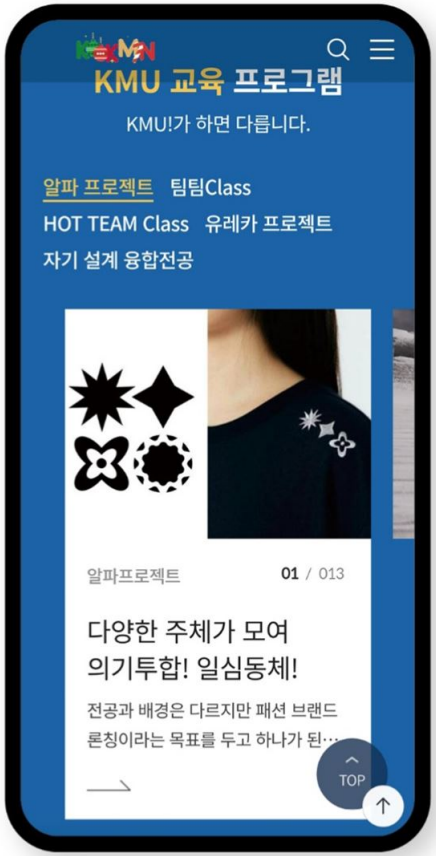
WEB AWARD

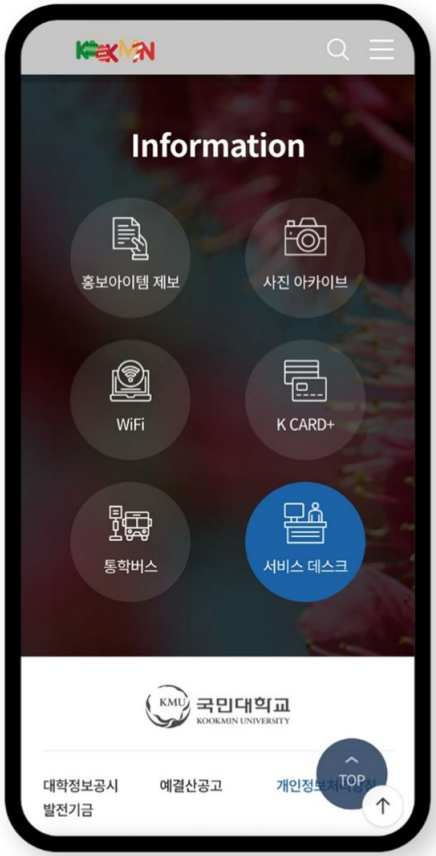
We built a smart campus with an open platform supporting organic communication and engagement.

Personalized features provide tailored information to students and staff, enhancing both operational convenience and learning satisfaction. Expanded SNS integration and community functions create an interactive environment that fosters internal and external communication, while data-driven management ensures efficient website operation and administration.









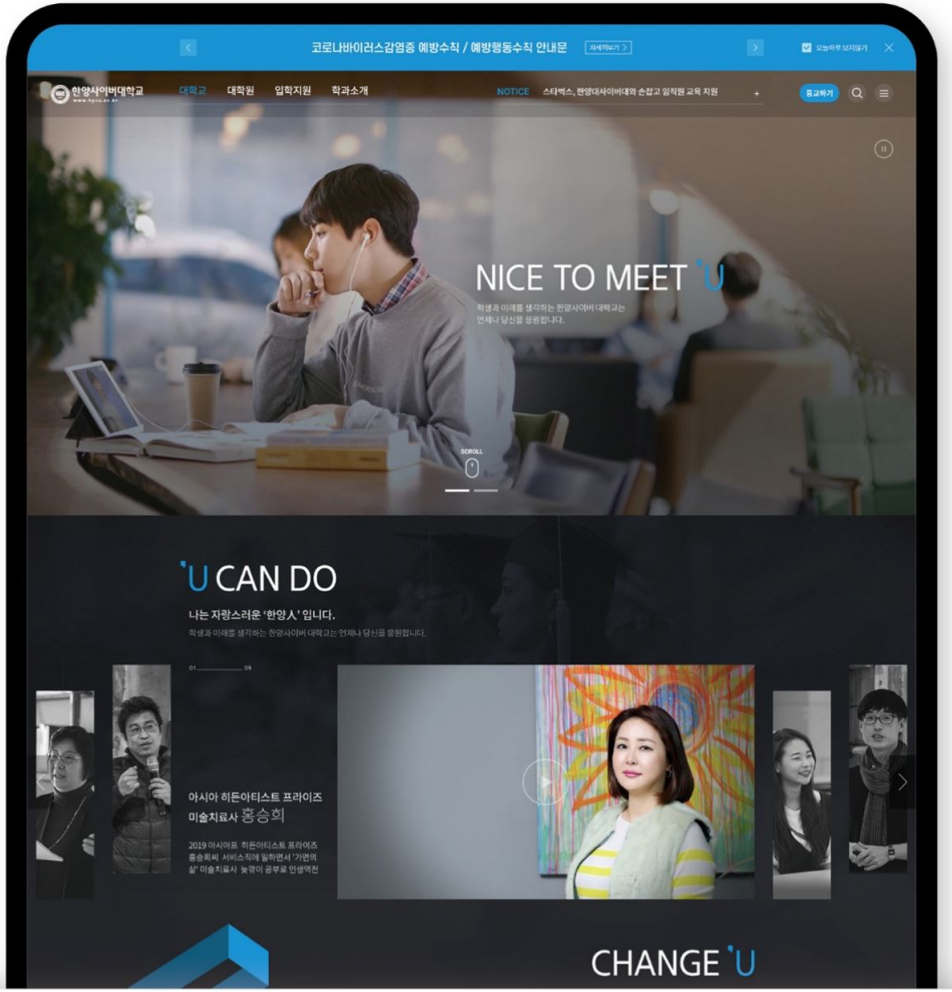
Digital Agency Services
Project Showcase

Hanyang Cyber University

WEB AWARD

We built advanced remote learning infrastructure and an integrated web environment for a prestigious cyber university.

Through high-quality design and sophisticated navigation reflecting Hanyang Cyber University's unique identity, we delivered an outstanding online education brand. Learner-centered, intuitive processes enhance course accessibility, while a responsive interface ensures a seamless, high-quality learning experience anytime, anywhere.



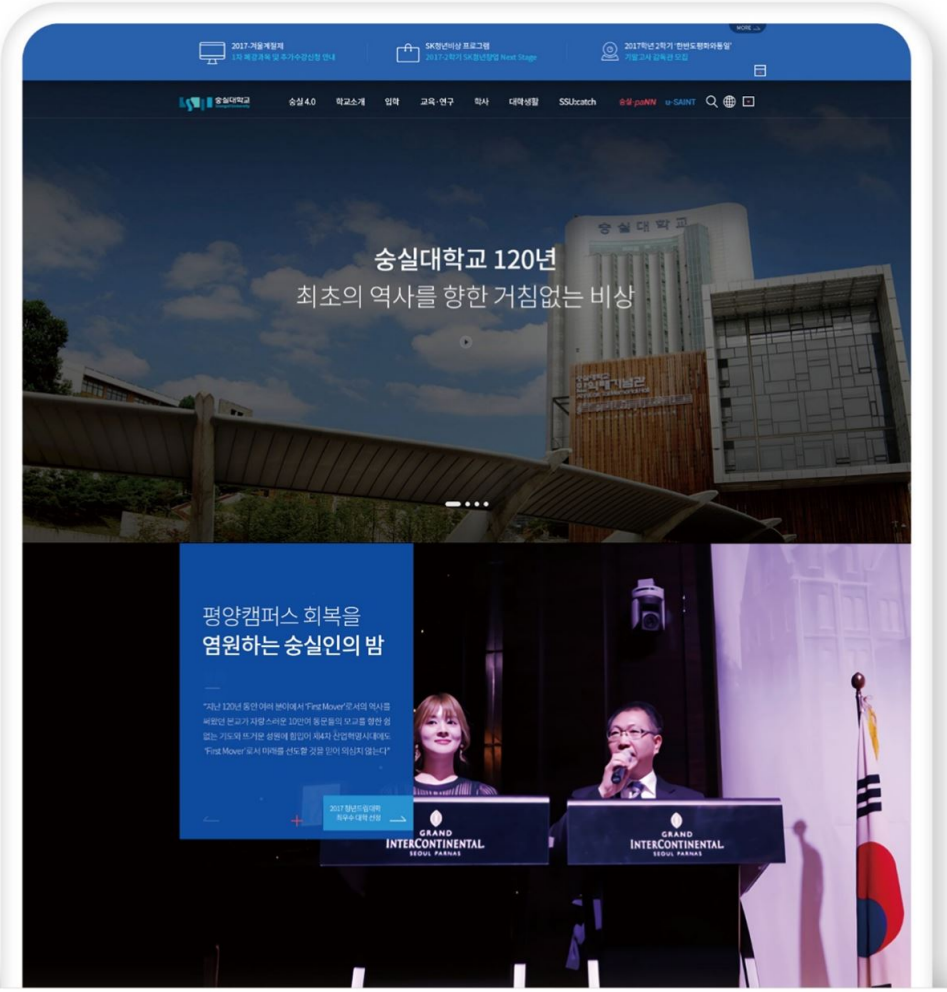
Digital Agency Services
Project Showcase

Soongsil University

WEB AWARD

We built a next-generation integrated web platform that reinterprets the university's historic brand identity.

To effectively promote Soongsil University's educational vision and research achievements, we delivered a web service that combines the latest design trends with advanced information architecture. User-centered, intuitive menu design shortens information discovery time and improves accessibility, while responsive web technology provides a refined digital experience for all members.



Red Diamond System Operation Services

Maintenance Services for Stable Service Operations

We provide comprehensive maintenance services for web and app services, including system monitoring, performance optimization, and security management. These services enhance system availability and deliver an optimal user experience for customers.

Efficient Management System for Incident Response

An efficient incident management system enables prompt issue reporting through a maintenance board and rapid response procedures. This ensures immediate resolution of issues, prevents recurrence, and supports smooth and systematic maintenance operations.

Extensive Experience in Website Operations

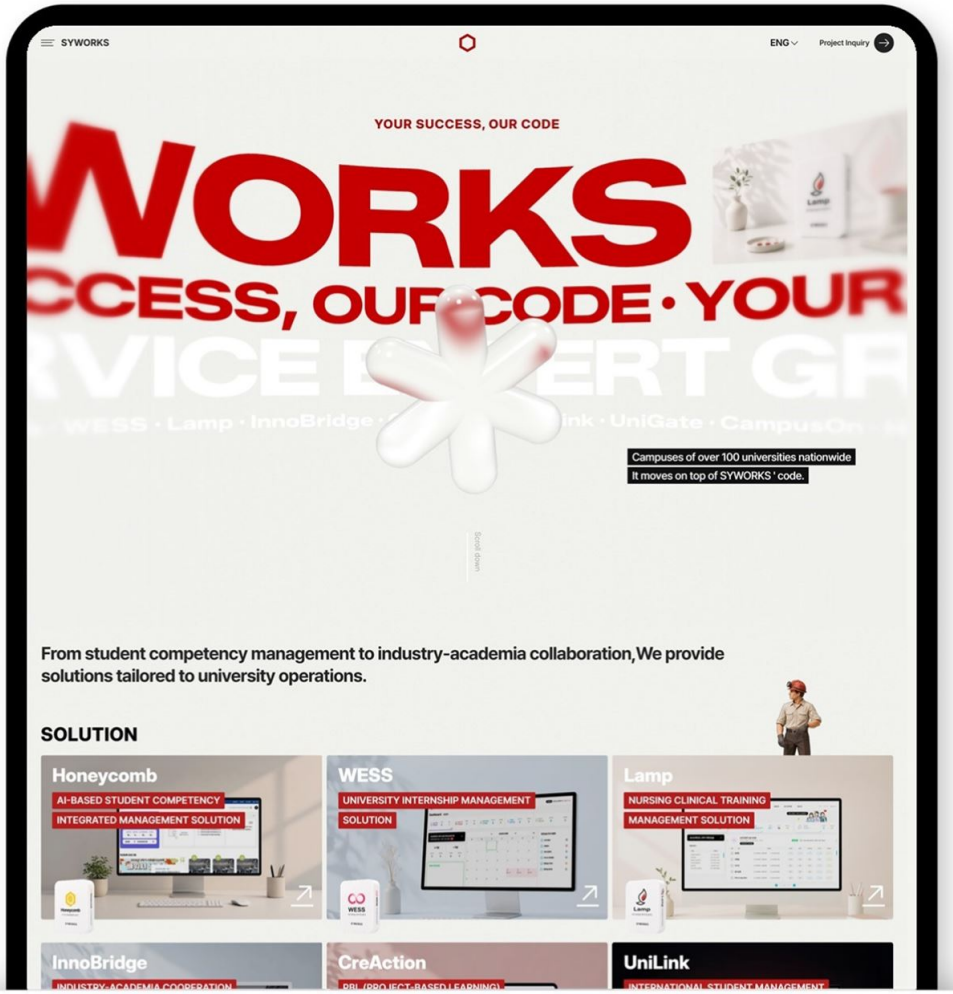
With years of experience operating and managing websites for numerous universities and enterprises, we also provide content production and management services, including banners, webzines, and newsletters.

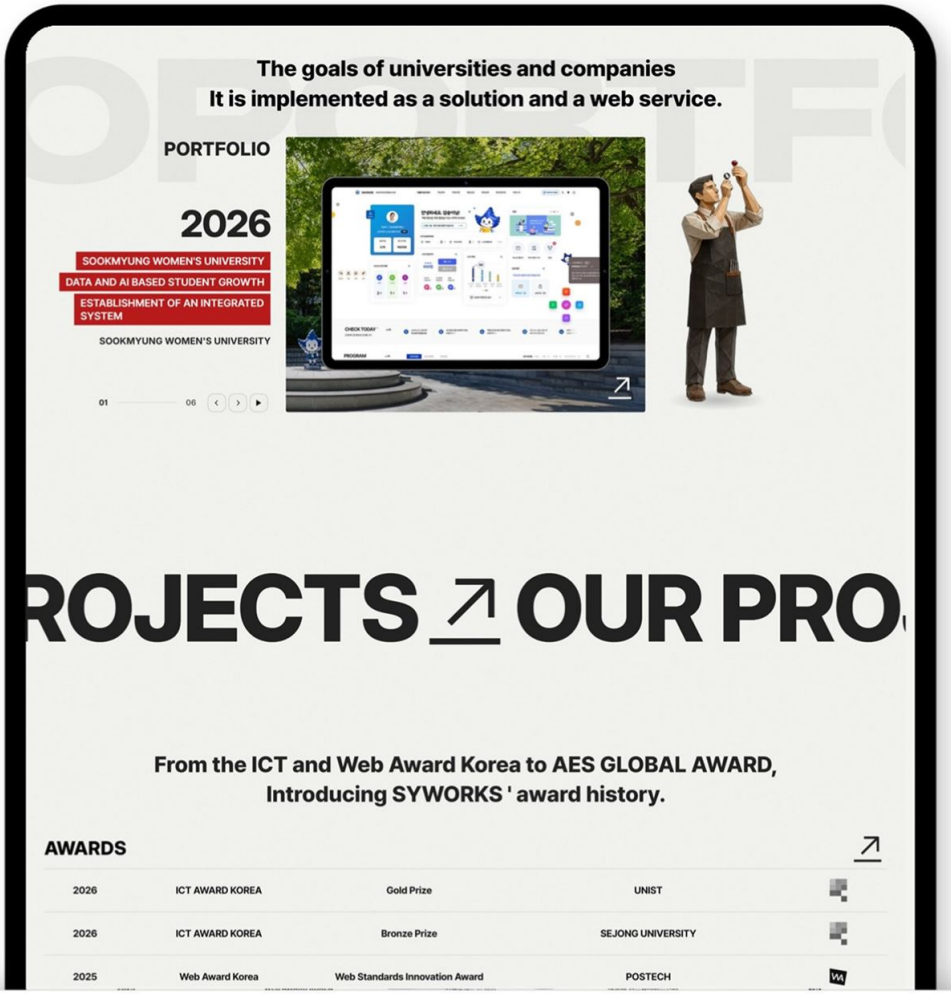
System Operation Services
Service Details

Main Page Management

We keep the homepage up to date and its information reliable through timely content updates.

The homepage shapes visitors' first impression of the website. We regularly update its key content and banners to provide visitors with timely, accurate, and up-to-date information. By maintaining consistent design standards and carefully managing content, we strengthen brand value and deliver a reliable user experience.



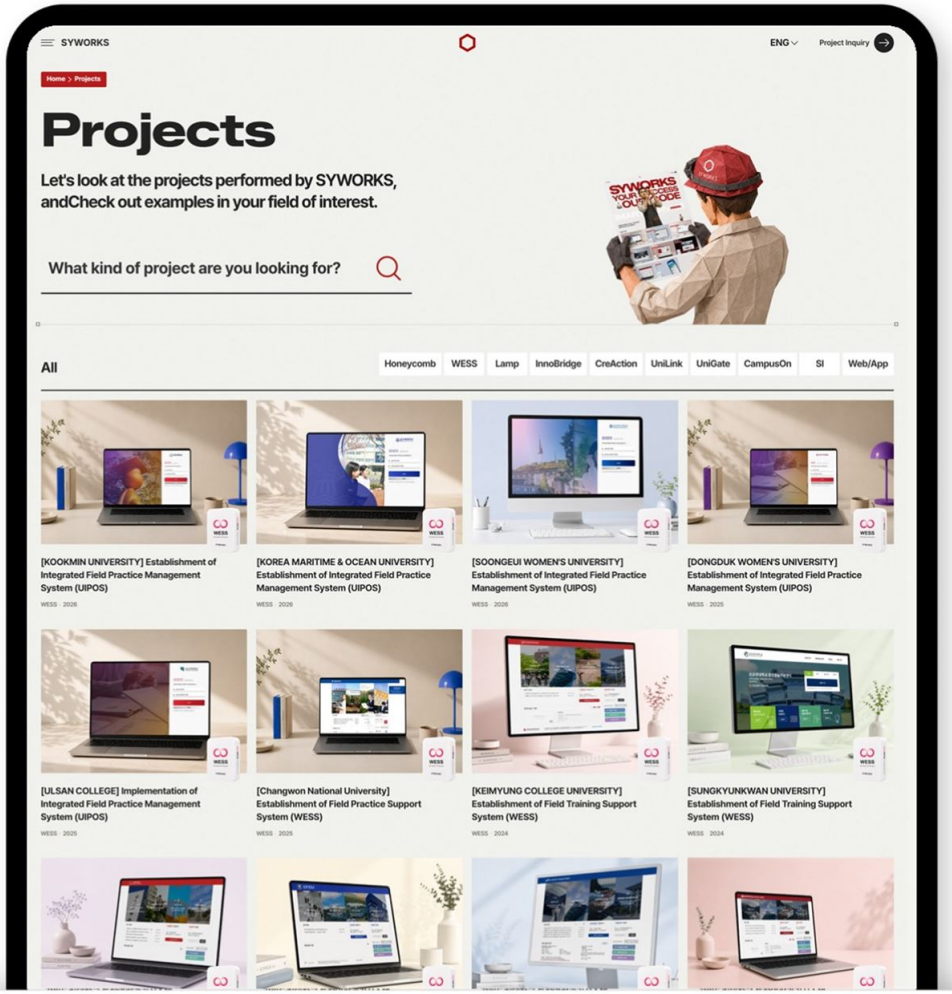


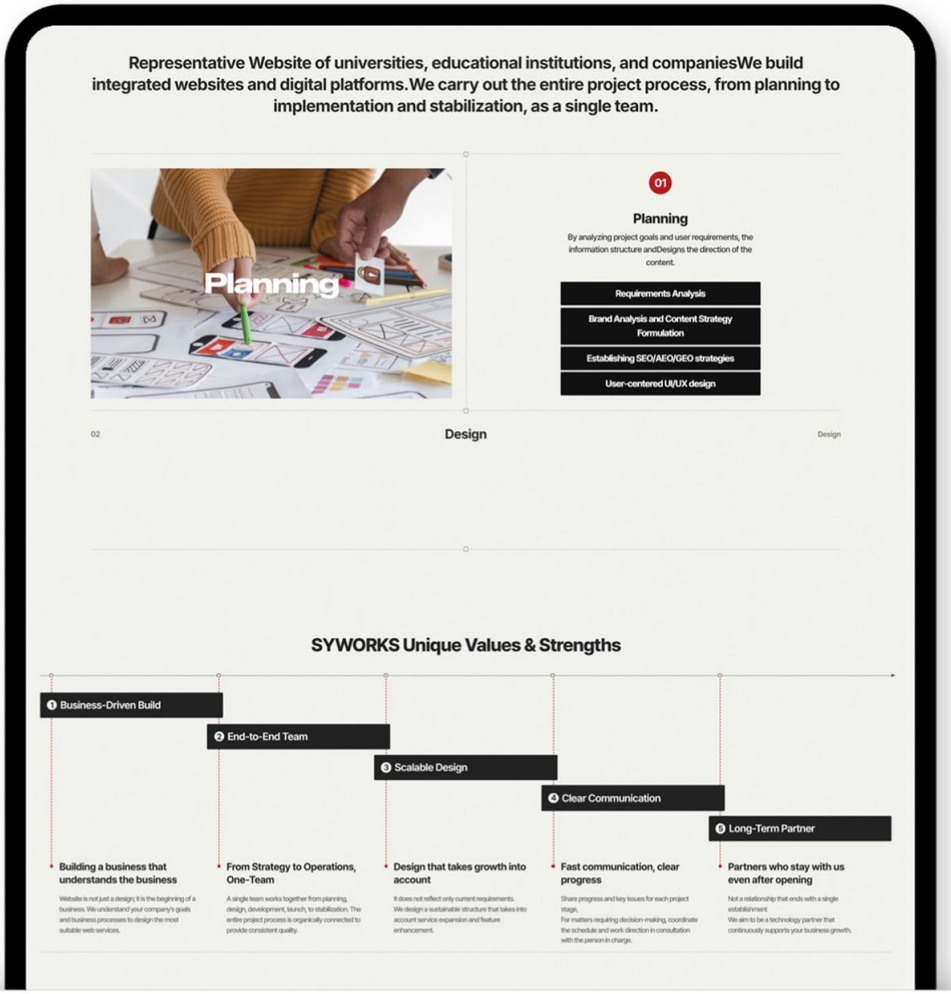
System Operation Services
Service Details

Detail Page Updates

We enhance user access to information through continuous content optimization and regular updates to detail pages.

New information is added or existing content is precisely refined to meet client requirements, keeping the website fresh and engaging. Professional design enhancements are applied without disrupting overall page consistency, while improvements to the information architecture enable users to find what they need quickly and easily.



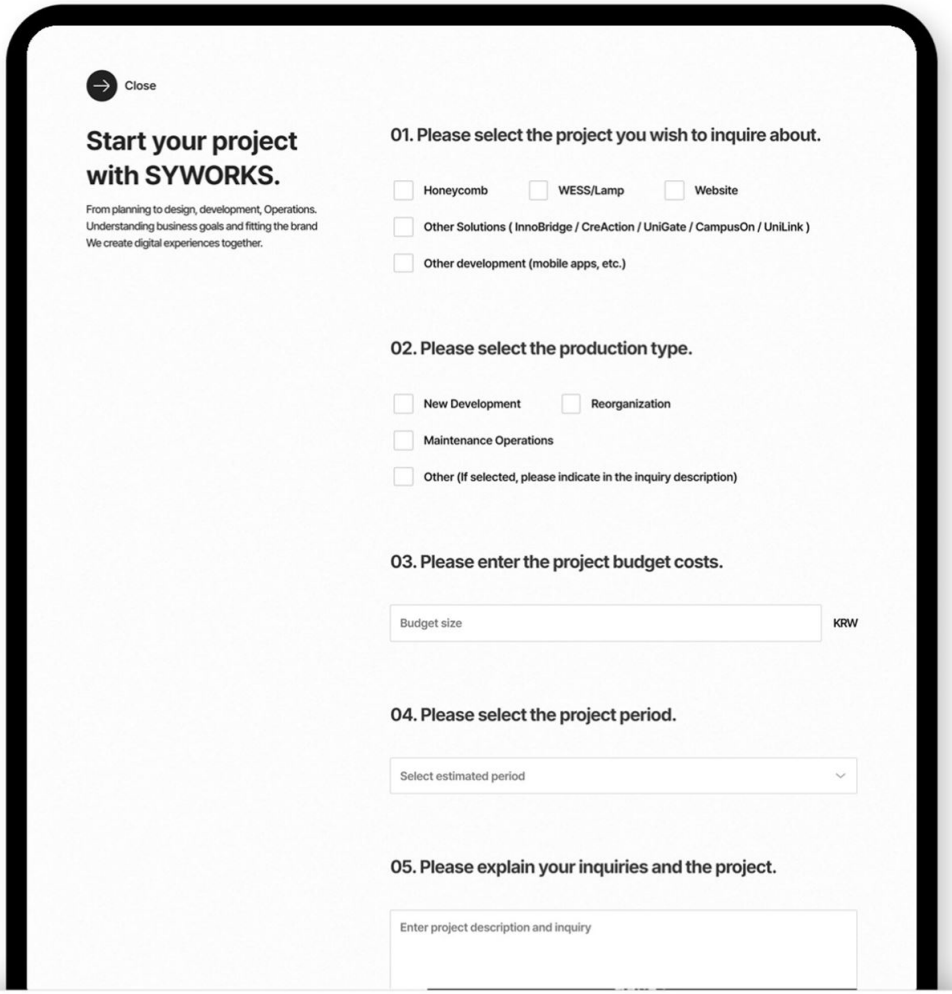


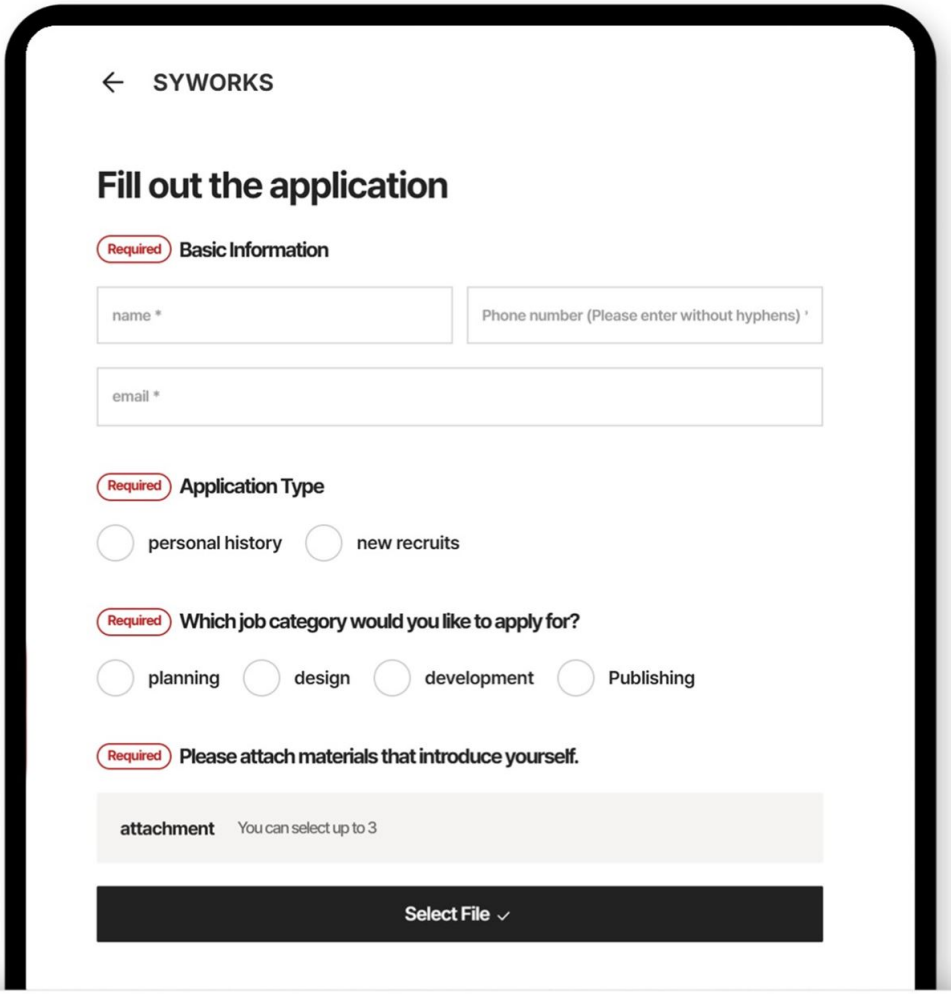
System Operation Services
Service Details

Customized Page Management

We deliver an optimal user experience through flexible, user-tailored page management.

We regularly review pages such as contact and careers and update them with current information to maintain service quality. By improving functionality based on user feedback and providing systematic maintenance, we help ensure smooth business processes while enhancing service satisfaction through a stable and reliable interface.



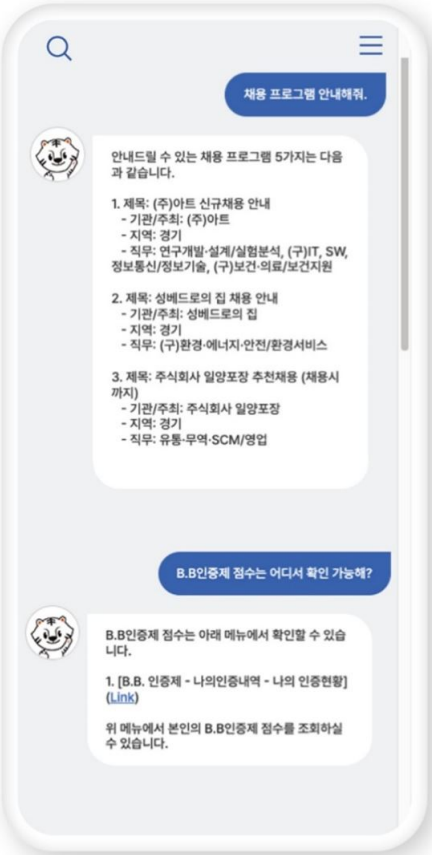


System Operation Services
Service Details

AI Chat

We operate a chatbot for real-time communication and efficient inquiry handling.

The chatbot system is regularly monitored to ensure prompt responses, with answer scenarios continuously updated to reflect new types of user questions. By optimizing the AI-based response engine, we handle repetitive inquiries efficiently, reducing administrative workload and improving overall user convenience.

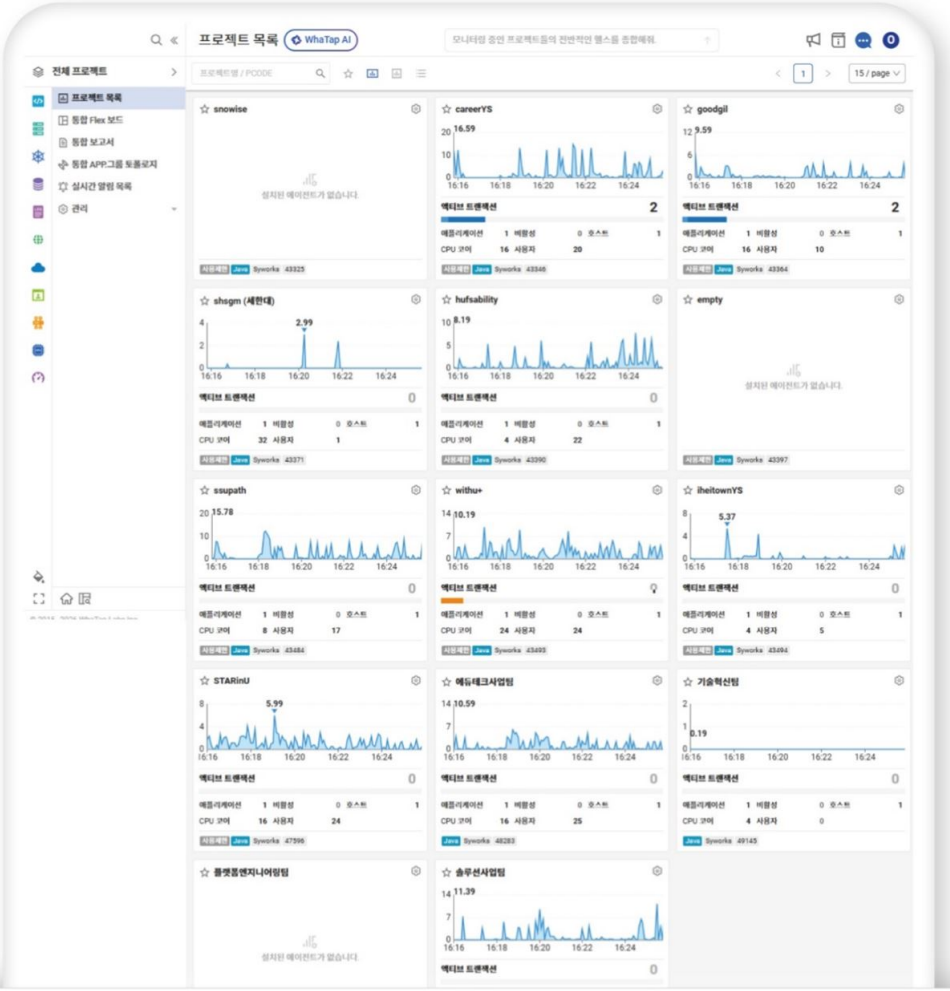


System Operation Services
Service Details

Server Stabilization

We support reliable server operations through real-time monitoring and proactive security management.

We monitor server status around the clock, apply regular updates, and optimize performance. Web vulnerability assessments, security management, and prompt incident response help keep services running reliably.

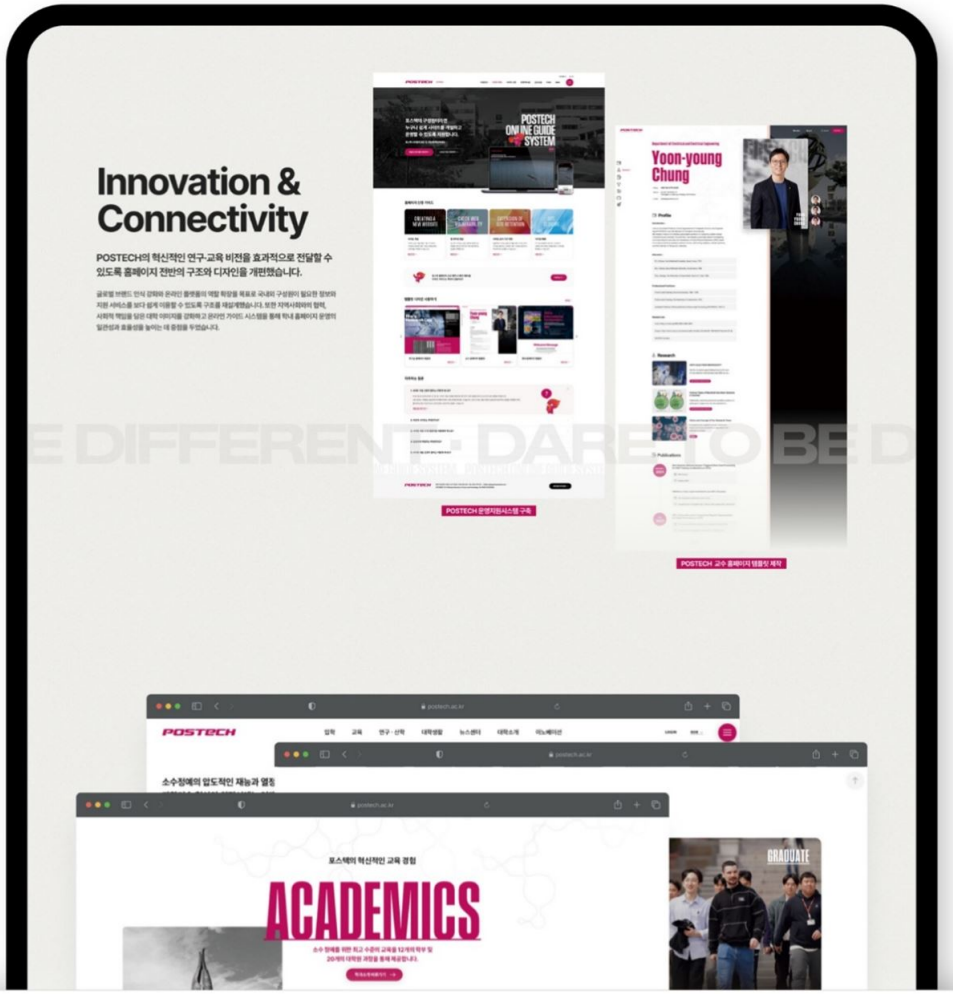


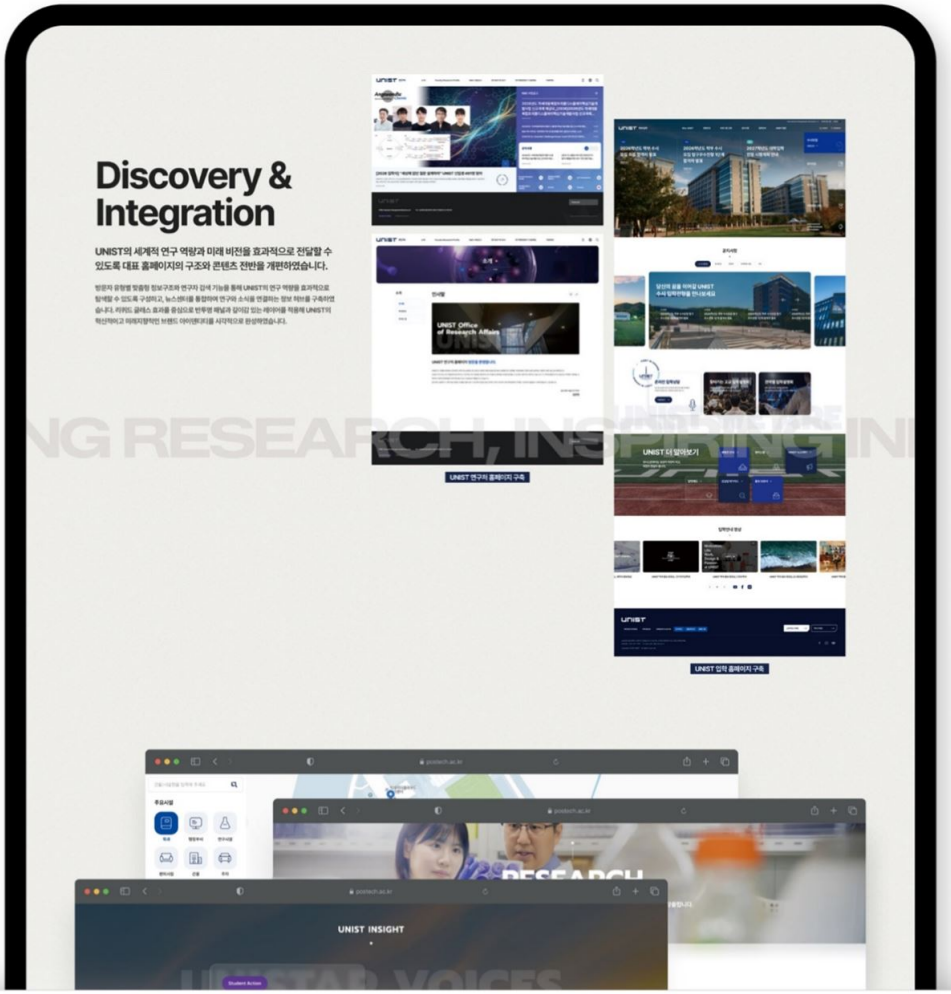
System Operation Services
Service Details

Promotional Management

We build promotional pages tailored to the needs of universities and other institutions and manage the content to support public outreach.

We create dedicated pages to publicize major events. Clear design and ongoing content management help institutions share event information, improve outreach, and strengthen their brand.





System Operation Services
Service Details

Newsletter Management

We share key updates through newsletter management that enables seamless member communication.

We organize university news by topic and tailor each newsletter's design and layout to its content. Ongoing content management helps universities share key updates and improve their outreach.
